The Evolution of Designs Philip Steadman, 2008-06-03 The Evolution of Designs tells the history of the many analogies that have been made since the end of the eighteenth century between the evolution of organisms and the human production of artefacts especially buildings

Holism and Reductionism in Biology and Ecology Rick C. Looijen, 2012-12-06 Holism and reductionism are traditionally seen as incompatible views or approaches to nature Here Looijen argues that they should rather be seen as mutually dependent and hence co operating research programmes He sheds some interesting new light on the emergence thesis its relation to the reduction thesis and on the role and status of functional explanations in biology He discusses several examples of reduction in both biology and ecology showing the mutual dependence of holistic and reductionist research programmes Ecologists are offered separate chapters clarifying some major yet highly and controversial ecological concepts such as community habitat and niche The book is the first in depth study of the philosophy of ecology Readership Specialists in the philosophy of science especially the philosophy of biology biologists and ecologists interested in the philosophy of their discipline Also of interest to other scientists concerned with the holism reductionism issue

Philosophy of Mind William Jaworski, 2011-05-06 Philosophy of Mind introduces readers to one of the liveliest fields in contemporary philosophy by discussing mind body problems and the various solutions to them It provides a detailed yet balanced overview of the entire field that enables readers to jump immediately into current debates Treats a wide range of mind body theories and arguments in a fair and balanced way Shows how developments in neuroscience biology psychology and cognitive science have impacted mind body debates Premise by premise arguments for and against each position enable readers to grasp the structure of each argument quickly and easily Diagrams and illustrations help readers absorb the more complex ideas Bibliographic essays at the end of each chapter bring readers up to date on the latest literature Written in a clear easy to read style that is free of technical jargon and highly accessible to a broad readership The only book to explain systematically how a hylomorphic theory such as Aristotle s can contribute to current mind body debates and vie with current mind body theories Online chapters on free will and the philosophy of persons make the book a flexible teaching tool for general and introductory philosophy courses available at www.wiley.com/go/jaworski

Nested Ecologies Rosalynn A. Vega, 2023-04-11 How functional medicine leverages systems biology and epigenetic science to treat the microbiome and reverse chronic disease Each body is a system within a system an ecology within the larger context of social political economic cultural and environmental factors This is one of the lessons of epigenetics whereby structural inequalities are literally encoded in our genes But our ecological embeddedness extends beyond DNA for each body also teems with trillions of bacteria yeast and fungi all of them imprints of our individual milieus Nested Ecologies asks what it would mean to take seriously our microbial being given that our internal ecologies are shaped by inequalities embedded in our physical and social environments Further Rosalynn Vega argues that health practices focused on patients unique biology inadvertently reiterate systemic inequities In particular functional medicine which attempts to heal chronic disease by leveraging epigenetic science and treating individual microbiomes reduces illness to problems of lifestyle principally diet while neglecting the inability of poor people to access nutrition Functional medicine thus undermines its own critique of the economics of health care Drawing on novel digital ethnographies and reflecting on her own experience of chronic illness Vega challenges us to rethink not only the determinants of well being but also what it is to be human

Wilson, 2012-12-06 I would like to record my thanks to Paul Thompson for useful conversations over the years and also to several generations of students who have helped me develop my ideas on biological theory and on Darwin My wife has as usual been more than helpful in particular she typed a good portion of the manuscript while I was on leave a few years ago more now than I like to remember My parents were both looking forward to holding a final copy of this book I only regret that my mother did not live long enough to see its completion I must also thank the publishers and their staff They have been remarkably patient about meeting deadlines promises were repeatedly made and then owing to family situations had to be broken and for this I am considerably in their debt I would further like to thank the following authors and publishers for permission to use their work R C Lewontin The Genetic Basis of Evolutionary Change Figure 1 p 14 1964 Columbia University Press reprinted here by kind permission of the author and publisher F Wilson Goudge's Contribution to the Philosophy of Science in L W Sumner J G Slater and F Wilson eds Pragmatism and Purpose Essays in Honour of T A Goudge 1964 University of Toronto Press reproduced here in part by kind permission of all the editors and the publisher

How Life Moves Caryn McHose, Kevin Frank, 2006-05-25 This comprehensive movement program uses the story of biological evolution as a tool to increase strength flexibility and body awareness Readers learn to unlearn inherited bodily habits by embodying the many forms that life has expressed on Earth from the single cell to the human being and shifting their perception Through this evolutionary movement the body's native intelligence is revived and new movements can be learned

enabling the body to overcome chronic musculoskeletal complaints such as lower back shoulder and neck pain and to meet whatever challenges it is faced with Early Modern Aesthetics J. Colin McQuillan, 2015-11-30 Early Modern Aesthetics is a concise and accessible guide to the history of aesthetics in the early modern period J Colin McQuillan shows how philosophers concerned with art and beauty positioned themselves with respect to the ancients and the moderns how they thought the arts were to be distinguished and classified the principles they proposed for art and literary criticism and how they made aesthetics a part of philosophy in the eighteenth century The book explores the controversies that arose among philosophers with different views on these issues their relation to the philosophy science and art and their legacy for contemporary aesthetics
