Bridging Research And Policy In Development Evidence And The Change Process:

The SAGE Handbook of Research Management Robert Dingwall, Mary Byrne McDonnell, 2015-08-17 The Handbook of Research Management is a unique tool for the newly promoted research leader. Larger scale projects are becoming more common throughout the social sciences and humanities housed in centres, institutes and programmes. Talented researchers find themselves faced with new challenges to act as managers and leaders rather than as individual scholars. They are responsible for the careers and professional development of others and for managing interactions with university administrations and external stakeholders. Although many scientific and technological disciplines have long been organized in this way, few resources have been created to help new leaders understand their roles and responsibilities and to reflect on their practice. This Handbook has been created by the combined experience of a leading social scientist and a chief executive of a major international research development institution and funder. The editors have recruited a truly global team of contributors to write about the challenges they have encountered in the course of their careers and to provoke readers to think about how they might respond within their own contexts. This book will be a standard work of reference for new research leaders in any discipline or country looking for help and inspiration. The editorial commentaries extend its potential use in support of training events or workshops where groups of new leaders can come together and explore the issues that are confronting them.

Science and Technology Policy for Development Louk de la Rive Box, Rutger Engelhard, 2006-05-01 This book is about changing social relationships. The authors focus on the question of what social relations make for successful science and technology policies. In particular, the various chapters illustrate what happens at different social interfaces such as between policy makers and researchers and between the users and producers of knowledge. In other words, they are interested in the knowledge networks that are emerging between the many different actors involved in the development of science and technology.

Research Skills for Policy and Development Alan Thomas, Giles Mohan, 2007-05-16 This book is a critical guide to conducting investigations under time and resource pressured conditions, equipping readers with the key skills and approaches for research designed to influence or inform development policies. Unlike a simple how-to guide, *Research Skills for Policy and Development* also provides a critique of various methods and situates these approaches within real-life organisational settings, enabling those working in or studying development to locate, evaluate and use relevant information quickly but rigorously. The successor to *Finding Out Fast* (SAGE 1998), it reflects the changes in development management theories and practice over the last seven years and includes new material and advice on critical use of the web as a resource and research tool. It is essential reading for development managers in NGOs and public sector agencies as well as students of development management and development studies more generally.

Understanding Influence Thomas Waldman, Sultan Barakat, 2016-02-24 The overarching objective of this book is to analyse the manner in which statebuilding-oriented research has and can influence policies in fragile post-conflict

environments Large scale externally assisted statebuilding is a relatively new and distinct foreign policy domain having risen to the forefront of the international agenda as the negative consequences of state weakness have been repeatedly revealed in the form of entrenched poverty regional instability and serious threats to international security Despite the increasing volume of research on statebuilding the use and uptake of findings by those involved in policymaking remains largely under examined As such the main themes running through the book relate to issues of research influence use and uptake into policy It grapples with problems associated with decision making dynamics knowledge management and the policy process and draws on concepts and analytical models developed within the public policy and research utilisation literature This book will be of great interest to researchers knowledge managers and policymakers working in the fields of post war reconstruction statebuilding fragile states stabilisation conflict and development

Knowledge Actors and Transnational Governance D. Stone, 2013-08-29 Diane Stone addresses the network alliances or partnerships of international organisations with knowledge organisations and networks Moving beyond more common studies of industrial public private partnerships she addresses how and why international organisations and global policy actors need to incorporate ideas expertise and scientific opinion into their global programmes Rather than assuming that the encouragement for evidence informed policy in global and regional institutions of governance is an indisputable public good she queries the influence of expert actors in the growing number of part private or semi public policy networks
