The Literature of the Ancient Egyptians, An Account of Egypt, The Religions of Ancient Egypt and Babylonia, Scarabs: The History, Manufacture and Symbolism of the Scarabæus in Ancient Egypt, Phoenicia, Sardinia, Etruria Sir Ernest Alfred Thompson Wallis Budge, Herodotus, Archibald Henry Sayce, Isaac Myer, 2020-09-28

The Literature of ancient Egypt is the product of a period of about four thousand years and it was written in three kinds of writing which are called hieroglyphic hieratic and demotic In the first of these the characters were pictures of objects in the second the forms of the characters were made as simple as possible so that they might be written quickly and in the third many of them lost their picture form altogether and became mere symbols Egyptian writing was believed to have been invented by the god Tehuti or Thoth and as this god was thought to be a form of the mind and intellect and wisdom of the God who created the heavens and the earth the picture characters or hieroglyphs as they are called were held to be holy or divine or sacred Certain religious texts were thought to possess special virtue when written in hieroglyphs and the chapters and sections of books that were considered to have been composed by Thoth himself were believed to possess very great power and to be of the utmost benefit to the dead when they were written out for them in hieroglyphs and buried with them in their coffins Thoth also invented the science of numbers and as he fixed the courses of the sun moon and stars and ordered the seasons he was thought to be the first astronomer He was the lord of wisdom and the possessor of all knowledge both heavenly and earthly divine and human and he was the author of every attempt made by man to draw paint and carve As the lord and maker of books and as the skilled scribe he was the clerk of the gods and kept the registers wherein the deeds of men were written down The deep knowledge of Thoth enabled him to find out the truth at all times and this ability caused the Egyptians to assign to him the position of Chief Judge of the dead A very ancient legend states that Thoth acted in this capacity in the great trial that took place in heaven when Osiris was accused of certain crimes by his twin brother Set the god of evil Thoth examined the evidence and proved to the gods that the charges made by Set were untrue and that Osiris had spoken the truth and that Set was a liar For this reason every Egyptian prayed that Thoth might act for him as he did for Osiris and that on the day of the Great Judgment Thoth might preside over the weighing of his heart in the Balance All the important religious works in all periods were believed to have been composed either by himself or by holy scribes who were inspired by him They were believed to be sources of the deepest wisdom the like of which existed in no other books in the world And it is probably to these books that Egypt owed her fame for learning and wisdom which spread throughout all the civilised world The Books of Thoth which late popular tradition in Egypt declared to be as many as 36 525 in number were revered by both natives and foreigners in a way which it is difficult for us in these days to realise The scribes who studied and copied these books were also specially honoured for it was believed that the spirit of Thoth the twice great and thrice great god dwelt in them The profession of the scribe was considered to be most honourable and its rewards were great for no rank and no dignity were too high for the

educated scribe Thoth appears in the papyri and on the monuments as an ibis headed man and his companion is usually a dog headed ape called Asten In the Hall of the Great Judgment he is seen holding in one hand a reed with which he is writing on a palette the result of the weighing of the heart of the dead man in the Balance The gods accepted the report of Thoth without question and rewarded the good soul and punished the bad according to his statement [The Literature of the Ancient Egyptians](#) Budge,2005

On Ancient Hindu Astronomy and Chronology Friedrich Max Müller,2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1862 edition Excerpt astrologiques ce besoin primitif et uniinstants ou ils se trouvent dans ce plan Vingt versel de l esprit humain Journal des Savants huit etoiles reparties sur le contour du ciel et 1861 p 9 toujours les memes leur servent comme autant de Though I had hoped that some one better qualified than myself would vindicate the Indian origin of the ancient Indian astronomy and though I consider Professor Whitney who to an extensive acquaintance with astronomy adds a scholar like knowledge of Sanskrit an antagonist even more formidable than Biot yet as I protested against the conclusions of the one I feel bound to oppose the arguments of the other I do not see that we gain any thing by assuming an indirect instead of a direct importation of Chinese wisdom into India particularly if the intermediate stage seems to have no other object than to bring the scientific discoveries of the Chinese down to the level of the Indian understanding Nor do I see that we fare better if as Professor Weber proposes we admit a spreading of astronomical knowledge from a Semitic centre and assume the fundamental notions of chrononomy to have been imported from Babylon to China on one side and to India on the other I differ toto ccelo from every one of these theories I feel as strongly to day as I did when in the year 1846 I read at Paris the articles then published by Biot that the Brahmans cannot have borrowed the idea of the Nakshatras from the Chinese I maintain 1 that the Nakshatras were suggested to the Hindus by the moon s sidereal revolution 2 that they were intended to mark certain equal divisions of the heavens and 3 that their number was originally twenty seven not twenty eight Die Vedischen *On Ancient Hindu Astronomy and Chronology (1862)* Max Muller,2009-08-01 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to the original work

The Teachings of Ptahhotep Ptahhotep,2016-02-08 2016 Reprint of 1909 Edition Full facsimile of the original edition not reproduced with Optical Recognition Software Originally published as The Instruction of Ptah Hotep and also as The Maxims of Ptahhotep the work is believed by some

scholars to be the oldest book in the world Authorship is attributed to Ptahhotep a vizier under King Isesi of the Egyptian Fifth Dynasty ca 2414-2375 BC It is a collection of maxims and advice in the sebayt teaching genre on human relations and are provided as instruction for his son The work survives today in papyrus copies including the Prisse Papyrus which dates from the Middle Kingdom and is on display at the Bibliotheque Nationale in Paris There are considerable differences between the Prisse Papyrus version and the two texts at the British Museum The 1906 translation by Battiscombe Gunn published as part of the Wisdom of the East series and which is reprinted here was made directly from the Prisse Papyrus in Paris rather than from copies Some lessons include Learning by listening to everybody and knowing that human knowledge is never perfect are a leitmotif Avoiding open conflict wherever possible should not be considered weakness Justice should be pursued and in the end it will be a god's command that prevails Greed is the base of all evil and should be guarded against while generosity towards family and friends is praiseworthy
