Benjamin Isadore Schwartz

Ancient China The Ancient World:

The World of Thought in Ancient China Benjamin Isadore Schwartz, 2009-06-30 The center of this prodigious work of scholarship is a fresh examination of the range of Chinese thought during the formative period of Chinese culture Schwartz looks at the surviving texts of this period with a particular focus on the range of diversity to be found in them but also considers views which stress the unity of Chinese culture *Life in Ancient China* Paul Clarence Challen, Paul Challen, 2005 Along China's Yellow River a mighty and technologically advanced civilization grew and flourished for thousands of years without any contact from the rest of the world *Life in Ancient China* explores the daily lives of early the Chinese people profiles the great dynasties that ruled China over the centuries and introduces important religious and philosophical contributions such as Confucianism Daoism and Buddhism Enduring Chinese innovations such as writing papermaking and The Great Wall are also featured *State Power in Ancient China and Rome* Walter Scheidel, 2015 Two thousand years ago the Qin Han and Roman empires were the largest political entities of the ancient world developing simultaneously yet independently at opposite ends of Eurasia Although their territories constituted only a small percentage of the global land mass these two Eurasian polities controlled up to half of the world population and endured longer than most pre modern imperial states Similarly their eventual collapse occurred during the same time The parallel nature of the Qin Han and Roman empires has rarely been studied comparatively Yet here is a collection of pioneering case studies compiled by Walter Scheidel that sheds new light on the prominent aspects of imperial state formation This essential new volume builds on the foundation of Scheidel's *Rome and China* 2009 and opens up a comparative dialogue among distinguished scholars They provide unique insights into the complexities of imperial rule including the relationship between rulers and elite groups the funding of state agents the determinants of urban development and the rise of bureaucracies By bringing together experts in each civilization *State Power in Ancient China and Rome* provides a unique forum to explore social evolution helping us further understand government and power relations in the ancient world *The Ancient Chinese* Virginia Schomp, 2010-01-15 A retelling of several important ancient Chinese myths with background information describing the history geography belief systems and customs of the people of China **Rome and China** Walter Scheidel, 2009-02-05 Transcending ethnic linguistic and religious boundaries early empires shaped thousands of years of world history Yet despite the global prominence of empire individual cases are often studied in isolation This series seeks to change the terms of the debate by promoting cross cultural comparative and transdisciplinary perspectives on imperial state formation prior to the European colonial expansion Two thousand years ago up to one half of the human species was contained within two political systems the Roman empire in western Eurasia centered on the Mediterranean Sea and the Han empire in eastern Eurasia centered on the great North China Plain Both empires were broadly comparable in terms of size and population and even largely coextensive in chronological terms 221 BCE to 220 CE for the Qin Han empire c 200 BCE to 395 CE for the unified

Roman empire At the most basic level of resolution the circumstances of their creation are not very different In the East the Shang and Western Zhou periods created a shared cultural framework for the Warring States with the gradual consolidation of numerous small polities into a handful of large kingdoms which were finally united by the westernmost marcher state of Qin In the Mediterranean we can observe comparable political fragmentation and gradual expansion of a unifying civilization Greek in this case followed by the gradual formation of a handful of major warring states the Hellenistic kingdoms in the east Rome Italy Syracuse and Carthage in the west and likewise eventual unification by the westernmost marcher state the Roman led Italian confederation Subsequent destabilization occurred again in strikingly similar ways both empires came to be divided into two halves one that contained the original core but was more exposed to the main barbarian periphery the west in the Roman case the north in China and a traditionalist half in the east Rome and south China These processes of initial convergence and subsequent divergence in Eurasian state formation have never been the object of systematic comparative analysis This volume which brings together experts in the history of the ancient Mediterranean and early China makes a first step in this direction by presenting a series of comparative case studies on clearly defined aspects of state formation in early eastern and western Eurasia focusing on the process of initial developmental convergence It includes a general introduction that makes the case for a comparative approach a broad sketch of the character of state formation in western and eastern Eurasia during the final millennium of antiquity and six thematically connected case studies of particularly salient aspects of this process

Dynamic Interpretation of Early Cities in Ancient China Hong Xu, 2021-06-14 This book offers an archaeological study on China's ancient capitals Using abundant illustrations of ancient capital sites it verifies the archaeological discoveries with documentary records The author introduces the dynamical interpretation of each ancient capital to the interpretation of the entire development history of China's ancient capitals The book points out that for most of the almost 2000 years from the earliest Erlitou to the Ye city there was an era where ancient capitals didn't have outer enclosures due to factors such as the strong national power the military and diplomatic advantage the complexity of the residents and the natural conditions Thus an era of the huge ancient capitals without guards lasting for over 1000 years formed The concept that China's ancient capitals don't have outer

enclosures presented in the book questions the traditional view that every settlement has walled enclosures Combining science with theory it offers researchers of history a clear understanding of the development process of China s ancient capitals
