10. What 5 types of evidence do scientists use to prove that organisms evolved from a common ancestor? Fossils, Similarities in early development, similarities in body structure, DNA, and protein structure.
11. These structures below are known as homologous structures and are evidence of a common ancestor.

12. Name the diagram to the right and explain what it is used for.

Branching tree – used to show how scientists think different groups of organisms are related.
