Mac User's Guide to Living Wirelessly Brad Miser, 2005 The major force driving people to embrace wireless computing is Wi-Fi. Once dismissed as a fad, Wi-Fi is rapidly becoming ubiquitous in the US and around the world. In 2004 more than half of all laptops sold in the US shipped with Wi-Fi installed. By 2007 most analysts predict that nearly every laptop sold in the US will include Wi-Fi. Nearly 20 million Wi-Fi access points will be sold this year up 20% from last year. As these numbers grow prices will continue to fall making Wi-Fi more attractive to more and more people. By the end of this year there will be more than 40,000 hotspots public Wi-Fi access points available across the US in hotels, fast food restaurants, cafés, airports, even parks. By 2007 that number will surpass 100,000. From McDonald's to Kinko's to Holiday Inn, Wi-Fi is becoming a killer amenity. Once Wi-Fi networks are in place they can be used for much more than just Internet access. For example, the AirPort Express allows users to stream iTunes throughout their homes wirelessly. Wi-Fi is being used to network printers, cameras, and ultimately home entertainment devices. *Apple Pro Training Series* Arek Dreyer, Ben Greisler, 2012-11-29 The only Apple certified book on OS X Server on Mountain Lion, this comprehensive reference takes support technicians and ardent Mac users deep inside the server for the latest operating system, covering everything from networking technologies to service administration, customizing users and groups, and more.
