The Power of Process Matthew Zayko,Eric Ethington,2021-10-28 Lean Process Creation teaches the specific frames the 6CON model to look through to properly design any new process while optimizing the value creating

resources The framing is applicable to create any process that involves people technology or equipment whether the application is in manufacturing healthcare services retail or other industries If you have a process this approach will help The result is 30% to 50% improvement in first time quality customer lead time capital efficiency labor productivity and floorspace that could add up to millions of dollars saved per year More important it will increase both employee and customer satisfaction The book details a case study from a manufacturing standpoint starting with a tangible example to reinforce the 6CON model This is the first book written from this viewpoint connecting a realistic transformation with the detailed technical challenges as well as the engagement of the stakeholders each with their own bias Key points and must do actions are sprinkled throughout the case study to reinforce learning from the specific to the general In this study an empowered working team is charged with developing a new production line for a critical new product As the story unfolds they create an improved process that saves 5 6 million 10x payback on upfront resource investment over the short life cycle of the product as well as other measurable benefits in quality ergonomics and delivery To an even greater benefit they establish a new way of working that can be applied to all future process creation activities Some organizations have tried their version of Lean process design following a formula or cookie cutter approach But true Lean process design goes well beyond forcing concepts and slogans into every situation It is purposeful scientific and adaptable because every situation starts with a unique current state In addition Lean process design must include both the technical and social aspects as they are essential to sustaining and improving any system Observing the recurring problem of reworking processes that were newly launched brought the authors to the conclusion that a practical book focused on introducing the critical frames of Lean process creation was needed This book enables readers to consider the details within each frame that must be addressed to create a Lean process No slogans no absolutes Real thinking is required This type of thinking is best learned from an example so the authors provide this case study to demonstrate the thinking that should be applied to any process High volume or low simple or complex mix manufacturing or service transactional the framing and thinking works Along with the thinking readers are enabled to derive their own future states This is demonstrated in the story that surrounds the case study
