The Director and The Manager David S. Fushtey, 2019-02-01 Machiavelli Had it Easy is an engaging text for the emerging discipline of governance. Gaps arise when directors and managers come together from diverse vocational and cultural languages and interests. Compressed information streams in the digital age yet few reconcile silos of business, legal expertise and regulatory public interests for informed decisions. This text presents research and a market tested decision framework for comparative law, market practice and human nature in the vital strategic oversight role of governance. Informed by cognitive science, business practice and legal duties, one conclusion is that bias and self interests are instinctive but reconciling best interests is not. Too often lessons learned from centuries of law are overlooked. The chapters are a dozen inquiries into recurring problems in the boardroom. Part one is an entry level technical reference of law and governance principles. Unique appendices of keywords and case notes will aid those new to markets governed by the western rule of law and those tripping on gaps in comparative jargon. Part two is a series of practical hot topics in the context of law and governance. Part three looks to next steps in accountability and liability. The text will help accountants, engineers, lawyers and business operations and market policy experts from around the world work together and professors, professionals and students anticipate change. After drilling through accountability and liability for hybrid organizations,

typical crises are revealed to be from a lack of aligning interests and related information churn Conclusions of the how and why of governance systems link the human condition and the rule of law in the digital age **Instincts by Design** Ernest Howard Callahan,2023-09-12 Inside Instincts by Design you will discover scientific mysteries of human and animal bodies only creation can explain This fascinating full color book explores the instincts that are necessary for life helpful for growth and necessary for protection Instincts by Design will keep readers captivated with answers to questions like these How does a baby know when to inhale and exhale How does a mother s milk change to mee the needs of her baby Why is the instinct to sleep one that we cannot override Why is it important that your tongue is the center of your taste receptors Why is the hunger instinct crucial for survival What instincts help brainless jellyfish hunt and kill their prey Why would God give horses the ability to sleep standing up How do more than 5000 species of birds journey thousands of miles every year The key question for someone doubting there is a God is whether these complex sets of instructions could have appeared without a Programmer Instincts by Design is the ProBible resource you will want to share with family and friends who need more evidence that they are fearfully and wonderfully made by the Almighty God Christian readers will finish this book with an awe of the creative perfectionist God who loves us so much that he did all this for everyone **Book Review Digest** ,1923
