

Art Appreciation Sem 1 Key Terms – Unit 1: Introduction to Painting

Unit 1: Introduction to Painting 1.1 – Broad Strokes- Principles of Painting

Key terms:

Aerial perspective: A painting technique in which an artist adjusts color hues and reduces the size of objects to make them seem farther away, also called atmospheric perspective. This is achieved by making nearby objects more vivid and distant objects duller.

Example:

Chiaroscuro: A combination of the Italian words for light and dark. In painting, the term refers to and relies on the contrast between light and dark.

- It directs the viewer's eye to look first at the illuminated part of the painting.
- Gives paintings shadows and makes them more realistic.

Contrast: In art, the difference between one extreme and another, such as light and dark or smooth and textured.

- This includes shading to make flat objects appear more realistic.
- The way that light and dark create shadows is the same in both art and real life.

Depth perception: The ability to see things in three dimensions (length, width, and depth). It uses perspective & color.

Flat painting: Paintings without depth or the illusion of three-dimensional space. There is no distinction between the foreground and the background. Objects, figures, and settings do not seem realistic.

Illusion of depth: when a painting looks realistic. Created using perspective and color variation

Linear perspective: A form of perspective in which parallel lines seem to converge (meet) on one or more vanishing points to give the illusion of depth and distance, also called geometric perspective.

- They have an established horizon line and a vanishing point.
- It is a technique based on geometry that tricks the eye into seeing depth.

Multiple-point perspective: A technique in which two or more vanishing points are used to create the illusion of depth on a flat surface.

- This uses two or more vanishing points.
- Vanishing points do not appear on the canvas itself in order to make the painting more realistic.

The vanishing point is where the two lines on the ground converge, or right in front of the doors.

Perspective: In art, a technique used to represent space and depth on a flat surface. It was influenced by research in geometry and mathematics & creates an illusion of depth in a piece which makes art more realistic.

sfumato: Italian for smoke. A technique created by Leonardo da Vinci in which layers of paint create gentle transitions between colors and objects.

- This technique created a gentle transition from one image to another by outlining them in a fine haze instead of thick black lines.
- Outlines forms in a realistic manner.

Shade: The combination of a color with black to make it darker; the opposite of tint.

Single-point perspective: A technique in which a single vanishing point is used to create the illusion of depth on a flat surface. This uses only one vanishing point.
