Book Description

The low adoption of most IT projects often stems from a lack of business process automation. Business Process Automation with Salesforce Flows will address this issue by helping you recognize the need for automation and guiding you through automating such processes. This book starts by quickly exploring various aspects of process automation using Salesforce Flows, covering flow nuts and bolts, flow structure, flow execution order, and different types of flows, as well as troubleshooting techniques to manage your processes using the Flow Builder tool. You'll then become acquainted with the Flow Orchestration tool, which enables you to compose and orchestrate complex business processes. Through real world scenarios, you'll learn how to effectively automate business processes, follow the end-to-end business process flow, automate it using flow orchestration, and learn how to demystify and simplify business process automation. By the end of this book, you'll be proficient in seamlessly automating your business processes without any hassle.

Salesforce Handbook Wes Nolte, Jeff Douglas, 2011-03-01

This book is not intended to be a deep dive on security, programming, reporting, configuration, etc., but more of a high-level overview on Salesforce.com, Force.com, development tools, methodology, and other resources. We will not cover all aspects of Salesforce.com. We wrote this book to hopefully become an invaluable resource for anyone new or inexperienced with the Force.com platform. For new administrators and developers coming on to the platform, we see a gaping hole in existing reference books. This book is not intended for end users or advanced developers. This book is for people somewhere in the middle, let's say a business analyst or a new Java or .NET developer. We would like this to be the first book you pick up after your boss walks in and says, "Let's take a look at Salesforce.com and see if we can build some applications in the cloud." This book contains the information that we wish we had when we started developing applications on
