Design is eminent throughout different disciplines of science engineering humanities and art However within these disciplines the way in which the term design is understood and applied differs significantly There still is a profound lack of interdisciplinary research on this issue The same term is not even guaranteed to carry the same meaning as soon as one crosses over to other disciplines Therefore related synergies between disciplines remain largely unexplored and unexploited This book will address design in the hope of promoting a deeper understanding of it across various disciplines and to support

Design Science as a discipline which attempts to cover the vast number of currently isolated knowledge sources
