difference the politics of texts and the politics of pedagogy Recognizing that a changing world requires new ways of thinking and that many approaches have watered down over time the new edition applies a sharp fresh look at established and new intellectual frameworks The second edition is comprehensively updated with additional research throughout and features new discussions of colonialism queer theory race and gender translanguaging and posthumanism With a critical focus on the role of applied linguists Pennycook emphasizes the importance of a situated collaborative perspective that takes the discussion away from questions of implementation and insists instead that critical applied linguistics has to be an emergent program from the contexts in which it works This landmark text is essential reading for students and researchers of applied linguistics multilingualism language and education TESOL and language and identity

Uncertainty in deliberate lexical interventions Mélanie Maradan, 2020-12-11 Language managers in their different forms language planners terminologists professional neologists have long tried to intervene in the lexical usage of speakers with various degrees of success Some of their lexical items partly penetrate language use others do not Based on electronic networks of practice of the Esperanto speech community Mélanie Maradan establishes the foundation for a new method to extract speakers' opinions on lexical items from text corpora The method is intended as a tool for language managers to detect and explore in context the reasons why speakers might accept or reject lexical items
