Getting Signed David Arditi, 2020-09-28 Record contracts have been the goal of aspiring musicians but are they still important in the era of SoundCloud Musicians in the United States still seem to think so flocking to auditions for The Voice and Idol brands or paying to perform at record label showcases in the hopes of landing a deal The belief that signing a record contract will almost infallibly lead to some measure of success the ideology of getting signed as Arditi defines it is alive and well Though streaming social media and viral content have turned the recording industry upside down in one sense the record contract and its mythos still persist Getting Signed provides a critical analysis of musicians contract aspirations as a cultural phenomenon that reproduces modes of power and economic exploitation no matter how radical the route to contract Working at the intersection of Marxist sociology cultural sociology critical theory and media studies Arditi unfolds how the ideology of getting signed penetrated an industry created a mythos of guaranteed success and persists in an era when power is being redefined in the light of digital technologies

Reconstructing Solidarity Virginia Lee Doellgast, Nathan Lillie, Valeria Pulignano, 2018 Work is widely thought to have become more precarious Many people feel that unions represent the interests of protected workers in good jobs at the expense of workers with insecure employment low pay and less generous benefits Reconstructing Solidarity Labour Unions Precarious Work and the Politics of Institutional Change in Europe argues the opposite that unions try to represent precarious workers using a variety of creative campaigning and organizing tactics Where unions can limit employers ability to exit labour market institutions and collective agreements and build solidarity across different groups of workers this results in a virtuous circle establishing union control over the labour market Where they fail to do so it sets in motion a vicious circle of expanding precarity based on institutional evasion by employers Reconstructing Solidarity examines how unions build or fail to build inclusive worker solidarity to challenge this vicious circle and to re regulate increasingly precarious jobs Comparative case studies from fourteen European countries describe the struggles of workers and unions in industries such as local government retail music metalworking chemicals meat packing and logistics Their findings argue against the thesis that unions act primarily to protect labour market insiders at the expense of outsiders
