Critical Approaches to the Australian Blue Humanities Maxine Newlands, Claire Hansen, 2024-08-07 This interdisciplinary edited collection explores and analyses the field of the blue humanities through an Australian lens The blue humanities is a way of understanding humanity's relationship with water and manifestations of what is referred to as the blue reefs oceans rivers creeks basins and inland bodies of water In its scope this collection emphasises both the importance of the local and the interconnectedness of Australia with global environmental concerns It considers how we conceptualise watery spaces and shades of blue in a country where water is often marked by its absence its ephemerality its politicisation and its dangers Contributors from environmental history environmental social science political science literary studies creative arts Indigenous Knowledge education and anthropology tackle various entanglements between the human the more than human and watery Australian spaces in modern culture It is the first volume to offer a specific dedicated focus on the intersections between Australian space and the blue humanities and it offers a pathway for those wishing to explore critique and advance ideas around the blue humanities in both research and teaching Directly contributing to a growing interdisciplinary field this is the first book to comprehensively examine the blue in Australia appealing to scholars educators and students working across the humanities and social sciences with an interest in the environmental humanities ecopolitics ecocriticism the blue humanities cultural geography environmental history and the role of place Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Evidence-Based Inquiries in Ethno-STEM Research Iman C Chahine, Josef de Beer, 2021-01-01 The purpose of the edited volume is to provide an international lens to examine evidence based investigations in Ethno STEM research Ethno science Ethno technology

Ethno engineering and Ethno mathematics These themes grew out of multi national multi institutional and multi disciplinary efforts to preserve as well as epitomize the role that Indigenous Knowledge Systems IKS play in cognitive development and its vital contributions to successful and meaningful learning in conventional and non conventional contexts Principled by the Embodied Situated and Distributed Cognition ESDC this innovative book will provide evidence supporting the embeddedness of a thinking in acting model as a fundamental framework that explains and supports students acquisition of scientific knowledge So often western science curricula are experienced as irrelevant since it does not take cognizance of the daily experiences and world in which the learner finds himself This book takes a socio cultural look at IKS and applies research in neuroscience to make a case its incorporation in the STEM Science Technology Engineering and Mathematics classroom We use the Embodied Situated Distributed Cognition ESDC Model as conceptual framework in this book Although the value of IKS is often acknowledged in curriculum policy documents teachers are most often not trained in incorporating IK in the classroom Teachers lack of the necessary pedagogical content knowledge PCK in effectively incorporating IK in their classrooms is a tremendous problem internationally Another problem is that IK is often perceived as pseudo science and scholars advocating for the incorporation of IK in the school curriculum often do not contextualize their arguments within a convincing theoretical and conceptual framework

What's Wrong with Stereotyping? Erin Beeghly,2025-02-20 What s Wrong with Stereotyping offers a refreshing and accessibly written philosophical take on the ethics of stereotyping Stereotyping is woven into every aspect of human experience conversation psychology algorithmic systems and culture It relates to generalization and induction core aspects of rationality But when and why it is morally wrong to stereotype This book tackles this deep and enduring puzzle To solve it Erin Beeghly delves into the relationship between stereotyping and another phenomenon discrimination Not only does stereotyping cause discriminatory treatment she argues stereotyping can itself be discriminatory This insight that to stereotype is to discriminate enables a novel philosophical methodology which builds towards a theory of wrongful stereotyping by analyzing the lived experiences of

marginalized groups and existing theories of wrongful discrimination Core chapters evaluate important ethical wrongs the failure to treat persons as individuals disrespect harm prejudice threats to freedoms and the failure to treat persons as equals One finds that there is no essence of wrongful stereotyping a single property or set of properties that all problematic cases share in common Nor are the wrongs of stereotyping reducible to an elegant number two or three Instead wrongful stereotyping is a messy normative kind characterized by clusters of wrong making properties including all the ones noted here and perhaps more Readers will come away with a radically pluralistic open ended theory of wrongful stereotyping that they can use to identify wrongful stereotyping in their own lives and our contemporary world Filled with thought provoking examples and models for social change this book emphasizes the messiness of moral reality and the importance of looking to the past in order to understand the ethical perils of stereotyping

Attention and its Crisis in Digital Society Enrico Campo, 2022-05-08 In the context of debates surrounding the effects of new technologies on our mental faculties particularly the attention span this volume addresses the notion of a deterioration of attention and the related ideas of cognitive overload an inability to concentrate and attention deficit disorder Through a new conceptualization of attention based not on individualistic or universalistic approaches but centered instead on the cultural and social variability of cognitive processes and the multiplicity of forces and environments that encourage stimulate and inhibit certain cognitive mechanisms the author rejects the idea of a degradation or crisis of attention and proposes an alternative vision of the problem of attention in contemporary societies Placing cultural conventions social norms and ecological environments at the forefront of our understanding of individual and collective attention *Attention and its Crisis in Digital Society* will appeal to scholars of sociology psychology and philosophy with interests in social theory cognitive processes and the criticisms often levelled at digital society and new technologies
