built upon a single distinctive human capacity. It may be that our highly evolved mental power to envision and think about the future is at the core of our greatest accomplishments and most unique human attributes. In *The Evolution of Future Consciousness*, psychologist and futurist Tom Lombardo examines the human ability to be conscious of the future to create ideas, images, goals, and plans about the future to think about these mental creations and use them in directing one's actions and one's life. In the opening chapter, he looks at the psychology of future consciousness and its values and benefits as well as ways to enhance this human ability. Subsequent chapters describe the emergence of future consciousness in pre-historic times and how it was critical in the development of love and bonding, the family, tools, and human aggression and hunting. The central importance of the future and time in early myths, religions, and classical philosophy and the rise of modern futurist thinking covering the Renaissance, the Scientific Revolution, the Western Enlightenment, and the Romantic counter-reaction. The book concludes with Darwin and how the theory of evolution revolutionized humanity's conception of both the past and the future. In its companion volume *Contemporary Futurist Thought*, Tom Lombardo completes his survey of the historical development of future consciousness, discussing significant ideas and approaches to the future in the last century, including science fiction, future studies, and an extensive array of recent theories and paradigms of the future. **The Ethical Society**

William T. Carruthers, 2021-08-19. How is it that we know we are headed for destruction as a species and yet are unable to effect the necessary changes needed for survival? We know from history that our current thinking and values will not lead to a peaceful, sustainable future. It is more crucial now than ever that we learn to break the cycle so that we can create a global community that balances diversity and individuality with integration and harmony. The answer lies in how we think. We are trapped in social systems based on power structures designed to keep us divided in antagonistic and non-viable behaviors. We have divorced how we understand the world through science with how we find meaning in our lives through religion, alienating us from the world and each other. To overcome these challenges, we need to focus our thinking on the global community by giving priority to universal ethical values. With ethical priority, we can shift power interests from a tribal to a human perspective and reconnect understanding with meaning. We can reduce alienation and improve harmony around the world. In *The Ethical Society*, William Carruthers provides the roadmap for us to finally achieve that peaceful, sustainable world.
