Beyond the Self-Managing School Brian Caldwell, Jim M. Spinks, 2003-09-02 The broad approach of local management of schools or self managing schools is now widely accepted. In Britain there is even consensus between the three major political parties that the approach should be continued and extended. A key issue though is what comes next for self managing schools. Drawing on their work and experience in research consultancy, Caldwell and Spinks examine the way in which education is changing and outline what is desirable and workable for schools today with clear guidelines for policy makers and practitioners. The focus is specifically on the school, the classroom, the student and the future of learning in society. Practitioners will find this book immediately accessible and useful. **Beyond Management** Ian Lennie, 1999-09-15 Ian Lennie's topical and practical text relates everyday management practice to contemporary management theories. This book discusses the impact of postmodern and constructionist thought on the traditional framework for understanding the behaviour of managers. By examining the importance of language, aesthetics, ethics and the individual psyche, this innovative book gives management students a new framework for understanding and applying management techniques in a complex environment. This book will give students a sense of the practical relevance of contemporary theory and will offer managers a radically different way of perceiving their enterprise and evaluating its effectiveness. *Beyond Change Management* Dean Anderson, Linda Ackerman Anderson, 2010-10-12 With this extensively upgraded second edition, Dean Anderson and Linda Ackerman Anderson solidify their status as the leading authorities on change leadership and organizational transformation.
