Beyond Banneker Beyond Banneker:

Beyond Banneker Erica N. Walker, 2014-05-29 An in depth look at the lives experiences and professional careers of Black mathematicians in the United States Erica N Walker presents a compelling story of Black mathematical excellence in the United States Much of the research and discussion about Blacks and mathematics focuses on underachievement by documenting in detail the experiences of Black mathematicians this book broadens significantly the knowledge base about mathematically successful African Americans Beyond Banneker demonstrates how mathematics success is fostered among Blacks by mathematicians mathematics educators teachers parents and others a story that has been largely overlooked by the profession and research community Based on archival research and in depth interviews with thirty mathematicians this important and timely book vividly captures important narratives about mathematics teaching and learning in multiple contexts as well as the unique historical and contemporary settings related to race opportunity and excellence that Black mathematicians experience Walker draws upon these narratives to suggest ways to capitalize on the power and potential of underserved communities to respond to the national imperative for developing math success for new generations of young people

Beyond Slavery's Shadow Warren Eugene Milteer Jr., 2021-09-15 On the eve of the Civil War most people of color in the United States toiled in bondage Yet nearly half a million of these individuals including over 250 000 in the South were free In Beyond Slavery's Shadow Warren Eugene Milteer Jr draws from a wide array of sources to demonstrate that from the colonial period through the Civil War the growing influence of white supremacy and proslavery extremism created serious challenges for free persons categorized as negroes mulattoes mustees Indians or simply free people of color in the South Segregation exclusion disfranchisement and discriminatory punishment were ingrained in their collective experiences Nevertheless in the face of attempts to deny them the most basic privileges and rights free people of color defended their families and established organizations and businesses These people were both privileged and victimized both celebrated and despised in a region characterized by social inconsistency Milteer's analysis of the way wealth gender and occupation intersected with ideas promoting white supremacy and discrimination reveals a wide range of social interactions and life outcomes for the South's free people of color and helps to explain societal contradictions that continue to appear in the modern United States

Fugitive Science Britt Rusert, 2017-04-18 Honorable Mention 2019 MLA Prize for a First Book Sole Finalist Mention for the 2018 Lora Romero First Book Prize presented by the American Studies Association Exposes the influential work of a group of black artists to confront and refute scientific racism Traversing the archives of early African American literature performance and visual culture Britt Rusert uncovers the dynamic experiments of a group of black writers artists and performers Fugitive Science chronicles a little known story about race and science in America While the history of scientific racism in the nineteenth century has been well documented there was also a counter movement of African Americans who worked to refute its claims Far from rejecting science these figures were careful readers of

antebellum science who linked diverse fields from astronomy to physiology to both on the ground activism and more speculative forms of knowledge creation Routinely excluded from institutions of scientific learning and training they transformed cultural spaces like the page the stage the parlor and even the pulpit into laboratories of knowledge and experimentation From the recovery of neglected figures like Robert Benjamin Lewis Hosea Easton and Sarah Mapps Douglass to new accounts of Martin Delany Henry Box Brown and Frederick Douglass *Fugitive Science* makes natural science central to how we understand the origins and development of African American literature and culture This distinct and pioneering book will spark interest from anyone wishing to learn more on race and society

Making Black Girls Count in Math Education Nicole M. Joseph, 2022-08-16 *Making Black Girls Count in Math Education* explores the experiences of Black girls and women in mathematics from preschool to graduate school deftly probing race and gender inequity in STEM fields Nicole M Joseph investigates factors that contribute to the glaring underrepresentation of Black female students in the mathematics pipeline Joseph's unflinching account calls attention to educational structures and practices that contribute to race and gender based stratification in science technology engineering and mathematics disciplines The author also disentangles a complex network of historical and sociopolitical elements that influence the perception and experiences of Black girls and women both inside and outside of mathematics education In her clear eyed assessment of the intersectional difficulties facing this marginalized group Joseph offers a critical view of the existing mathematics education research practice and policies that have neglected Black girls and women confronts the problematic history of mathematics education policy and considers imbalances in the current teacher workforce in US mathematics programs She then provides practical actionable suggestions for reform Joseph invites students families and educators as well as researchers policy makers and other relevant stakeholders to disrupt systems structures and ideologies She calls for an end to racism and sexism in many areas of mathematics education including learning environments curriculum design and implementation and testing and assessments An essential read for anyone concerned about supporting the mathematical learning and development of Black girls and women this work advocates for coalition building so that greater more equitable opportunities for learning and engagement may be offered to Black female students

Black Prometheus Jared Hickman, 2017 An innovative transnational literary study *Black Prometheus* tracks the mythical figure's surprising resonance in Anglo American antislavery discourse from 1800 until the end of the U S Civil War

Genius in Bondage Vincent Carretta, Philip Gould, 2021-05-11 Until fairly recently critical studies and anthologies of African American literature generally began with the 1830s and 1840s Yet there was an active and lively transatlantic black literary tradition as early as the 1760s *Genius in Bondage* situates this literature in its own historical terms rather than treating it as a sort of prologue to later African American writings The contributors address the shifting meanings of race and gender during this period explore how black identity was cultivated within a capitalist economy discuss the impact of Christian religion and the Enlightenment on

definitions of freedom and liberty and identify ways in which black literature both engaged with and rebelled against Anglo American culture *Women of Color In STEM* Beverly Irby, Nahed Abdelrahman, Barbara Polnick, Julia Ballenger, 2021-03-01 Though there has been a rapid increase of women's representation in law and business their representation in STEM fields has not been matched Researchers have revealed that there are several environmental and social barriers including stereotypes gender bias and the climate of science and engineering departments in colleges and universities that continue to block women's progress in STEM In this book the authors address the issues that encounter women of color in STEM in higher education *Mathematics for Human Flourishing* Francis Su, 2020-01-07 Winner of the Mathematics Association of America's 2021 Euler Book Prize this is an inclusive vision of mathematics its beauty its humanity and its power to build virtues that help us all flourish This is perhaps the most important mathematics book of our time Francis Su shows mathematics is an experience of the mind and most important of the heart James Tanton Global Math Project A good book is an entertaining read A great book holds up a mirror that allows us to more clearly see ourselves and the world we live in Francis Su's *Mathematics for Human Flourishing* is both a good book and a great book MAA Reviews For mathematician Francis Su a society without mathematical affection is like a city without concerts parks or museums To miss out on mathematics is to live without experiencing some of humanity's most beautiful ideas In this profound book written for a wide audience but especially for those disenchanted by their past experiences an award winning mathematician and educator weaves parables puzzles and personal reflections to show how mathematics meets basic human desires such as for play beauty freedom justice and love and cultivates virtues essential for human flourishing These desires and virtues and the stories told here reveal how mathematics is intimately tied to being human Some lessons emerge from those who have struggled including philosopher Simone Weil whose own mathematical contributions were overshadowed by her brother's and Christopher Jackson who discovered mathematics as an inmate in a federal prison Christopher's letters to the author appear throughout the book and show how this intellectual pursuit can and must be open to all *Bad at Math?* Lidia Gonzalez, 2023-02-03 Math really is for everyone so let's prove it You've heard it from kids from friends and from celebrities I'm bad at math It's a line that society tends to accept without examination after all some people just aren't math people right Wrong As we do with other essential skills we need to expose the stereotypes challenge the negative mindsets and finally confront the systemic opportunity gaps in math education and replace them with a new vision for what math is who it's for and who can excel at it In this book you'll find Research on teacher and student mindsets and their effect on student achievement Audience specific and differentiated tools reflection questions and suggested actions for educators at all levels of the system Examples from popular media as well as personal stories and anecdotes Quotes data driven figures and suggestions for deeper learning on all aspects of a positive and equitable vision of math education Both social commentary and a toolkit of solutions this bold new book directly challenges the constructs that have historically dictated our perceptions

of what makes someone a math person Only by dismantling those misplaced assumptions can we reform math education so it works for everyone Because in truth we are all math people

For White Folks Who Teach in the Hood... and the Rest of Y'all Too Christopher Emdin, 2017-01-03 A New York Times Best Seller Essential reading for all adults who work with black and brown young people Filled with exceptional intellectual sophistication and necessary wisdom for the future of education Imani Perry National Book Award Winner author of *South To America* An award winning educator offers a much needed antidote to traditional top down pedagogy and promises to radically reframe the landscape of urban education for the better Drawing on his own experience of feeling undervalued and invisible in classrooms as a young man of color Dr Christopher Emdin has merged his experiences with more than a decade of teaching and researching in urban America He takes to task the perception of urban youth of color as unteachable and he challenges educators to embrace and respect each student s culture and to reimagine the classroom as a site where roles are reversed and students become the experts in their own learning Putting forth his theory of Reality Pedagogy Emdin provides practical tools to unleash the brilliance and eagerness of youth and educators alike both of whom have been typecast and stymied by outdated modes of thinking about urban education With this fresh and engaging new pedagogical vision Emdin demonstrates the importance of creating a family structure and building communities within the classroom using culturally relevant strategies like hip hop music and call and response and connecting the experiences of urban youth to indigenous populations globally Merging real stories with theory research and practice Emdin demonstrates how by implementing the Seven Cs of reality pedagogy in their own classrooms urban youth of color benefit from truly transformative education

Enjoying the Track of Appearance: An Psychological Symphony within **Beyond Banneker Beyond Banneker**

In a world eaten by screens and the ceaseless chatter of instantaneous communication, the melodic beauty and emotional symphony developed by the written word usually fade into the background, eclipsed by the relentless noise and distractions that permeate our lives. Nevertheless, set within the pages of **Beyond Banneker Beyond Banneker** a marvelous fictional value full of raw feelings, lies an immersive symphony waiting to be embraced. Crafted by an outstanding musician of language, that fascinating masterpiece conducts readers on a psychological journey, well unraveling the hidden melodies and profound impact resonating within each cautiously constructed phrase. Within the depths of the poignant evaluation, we shall examine the book is key harmonies, analyze its enthralling writing model, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
