A Topology of Everyday Constellations Georges Teyssot, 2013-02-22 The threshold as both boundary and bridge investigations of spaces public and private local and global Today spaces no longer represent a bourgeois haven nor are they the sites of a classical harmony between work and leisure private and public the local and the global The house is not merely a home but a position for negotiations with multiple spheres the technological as well as the physical and the psychological In A Topology of Everyday Constellations Georges Teyssot considers the intrusion of the public sphere into private space and the blurring of notions of interior privacy and intimacy in our societies He proposes that we rethink design in terms of a new definition of the practices of everyday life Teyssot considers the door the window the mirror and the screen as thresholds or interstitial spaces that divide the world in two the outside and the inside Thresholds he suggests work both as markers of boundaries and as bridges to the exterior The stark choice between boundary and bridge creates a middle space an in between that holds the possibility of exchanges and encounters If the threshold no longer separates public from private and if we can no longer think of the house as a bastion of privacy Teyssot asks does the body still inhabit the house or does the house evolving into a series of microdevices inhabit the body
