*Beyond the Trees* Candice Gaukel Andrews, 2011-05-30 Resource added for the Landscape Horticulture Technician program 100014 *Walking Home Ground* Robert Root, 2017-10-24 When longtime author Robert Root moves to a small town in southeast Wisconsin he gets to know his new home by walking the same terrain traveled by three Wisconsin luminaries who were deeply rooted in place John Muir Aldo Leopold and August Derleth Root walks with Muir at John Muir State Natural Area with Leopold at the Shack and with Derleth in Sac Prairie closer to home he traverses the Ice Age Trail often guided by such figures as pioneering scientist Increase Lapham Along the way Root investigates the changes to the natural landscape over nearly two centuries and he chronicles his own transition from someone on unfamiliar terrain to someone secure on his home ground In prose that is at turns introspective and haunting *Walking Home Ground* inspires us to see history s echo all around us the parking lot that once was forest the city that once was glacier Perhaps this book is an invitation to walk home ground Root tells us Perhaps too it s a time capsule a message in a bottle from someone given to looking over his shoulder even as he tries to examine the ground beneath his feet **Wisconsin Magazine of History** Milo Milton Quaife, Joseph Schafer, Edward Porter Alexander, 2010 *Nature Attacks! (I Survived True Stories #2)* Lauren Tarshis, 2015-09-29 From the author of the New York Times bestselling *I Survived* series come four harrowing true stories of survival featuring real kids in the midst of epic disasters **REAL KIDS REAL DISASTERS** The author of the New York Times bestselling *I Survived* series brings us more harrowing true stories of real kids up against terrible forces of nature From fourteen year old lone survivor of the shark attacks of 1916 to nine year old who survived the Peshtigo fire of 1871 which took place on the very same day in history as the Great Chicago Fire here are four unforgettable survivors who managed to beat the odds Read their incredible stories *The Deadly Shark Attacks of 1916* *The Great Peshtigo Fire of 1871* *A Venomous Box Jellyfish Attack* *The Eruption of Mount Tambora* *Beyond the Freeway* Peter Benzoni, 2001 **Chequamegon-Nicolet National Forest (N.F.), Boulder Project**, 2007 *Western Trees, Parks and Forests*, 1964 **Chequamegon-Nicolet National Forest (N.F.), Fishbone Project**, 2007 *A Scientist Audits the Earth* Stuart Leonard Pimm, 2004 Humans use 50 percent of the world s freshwater supply and consume 42 percent of its plant growth We are liquidating animals and plants one hundred times faster than the natural rate of extinction Such numbers should make it clear that our impact on the planet has been and continues to be extreme and detrimental Yet even after decades of awareness of our environmental peril there remains passionate disagreement over what the problems are and how they should be remedied Much of the impasse stems from the fact that the problems are difficult to quantify How do we assess the impact of habitat loss on various species when we haven t even counted them all And just what factors go into that 42 percent of biomass we are hungrily consuming It is only through an understanding of the numbers that we will be able to break that impasse and come to agreement on which environmental issues are most critical and how they might best be addressed Working on the front lines of

conservation biology Stuart Pimm is one of the pioneers whose work has put the science in environmental science In this book he appoints himself investment banker of the global biological accounts checking the environmental statistics gathered by tireless scientists in work that is always painstaking and often heartbreaking With wit passion and candor he reveals the importance of understanding where these numbers come from and what they mean To do so he takes the reader on a globe circling tour of our beautiful but weary planet from the volcanic mountains and rainforests of Hawai i to the boreal forests of Siberia At times the view looks rather grim Yet Pimm ever the optimist presents a world filled with mysterious beauty the infinite variety of nature and an urgent hope that through an understanding of our planet s environmental past and present we will be inspired to save it from future extinction Chequamegon-Nicolet National Forest (N.F.), Camp Four Vegetation Project ,2009
