Women and Depression

Corey L. M. Keyes, Sherryl H. Goodman, 2006-01-23 Throughout the world rates of depression are greater among females than males and this gender gap emerges during adolescence and persists throughout adulthood Until recently women's health has centered on the topic of reproductive health because research focused almost exclusively on biological and anatomical differences distinguishing men and women Social and behavioral research on gender differences in health now employs multiple disciplinary frameworks and methodologies and researchers seek to understand the higher rates of specific diseases and disorders in women and men Symptoms of depression and the diagnosis of depression are more prevalent in women and research that focuses on biological psychological and sociopolitical explanations for this gender gap should now be brought together to better inform efforts at treatment and prevention Women and Depression is a handbook that serves to move toward a more integrative approach to women's depression in particular and mental health for all more generally

Resources in Education, 1971 Informing Social Security's Process for Financial Capability Determination National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on the Health of Select Populations, Committee to Evaluate the Social Security Administration's Capability Determination Process for Adult Beneficiaries, 2016-05-20 The U S Social Security Administration SSA provides benefits to disabled adults and children offering vital financial support to more than 19 million disabled Americans Of that group approximately 5.5 million have been deemed by virtue of youth or mental or physical impairment incapable of managing or directing the management of their benefits Hence a representative payee has been appointed to receive and disburse SSA payments for these beneficiaries to ensure that their basic needs for shelter food and clothing are met Periodically however concerns have been expressed about the accuracy of the process by which SSA determines whether beneficiaries are capable of managing their benefits with some evidence suggesting that underdetection of incapable recipients may be a particular problem The importance of creating as accurate a process as possible for incapability determinations is underscored by the consequences of incorrectly identifying recipients either as incapable when they can manage their benefits or as capable when they cannot Failure to identify beneficiaries who are incapable of managing their funds means abandoning a vulnerable population to potential homelessness hunger and disease Informing Social Security's Process for Financial Capability Determination considers capability determination processes used by other similar benefit programs abilities required to manage and direct the

management of benefits and effective methods and measures for assessing capability This report evaluates SSA s capability determination process for adult beneficiaries and provides recommendations for improving the accuracy and efficiency of the agency s policy and procedures for making these determinations

web friction stir welding fsw is a solid state joining process developed at twi ltd in 1991 fsw works by using a non consumable tool which is rotated and plunged into the interface of two workpieces the tool is then moved through the interface and the frictional heat causes the material to heat and soften
