Biosecurity Interventions Andrew Lakoff, Stephen J. Collier, 2008 The product of collaboration between anthropologists geographers sociologists and even a chemist this volume delves into the design and implementation of global bio security interventions

**Pathological Lives** Steve Hinchliffe, Nick Bingham, John Allen, Simon Carter, 2016-12-27 Pandemics epidemics and food borne diseases are a major global challenge Focusing on the food and farming sector and mobilising social theory as well as empirical enquiry Pathological Lives investigates current approaches to biosecurity and ask how pathological lives can be successfully regulated without making life more dangerous as a result Uses empirical and social theoretical resources developed in the course of a 40 month research project entitled Biosecurity borderlands Focuses on the food and farming sector where the generation and subsequent transmission of disease has the ability to reach pandemic proportions Demonstrates the importance of a geographical and spatial analysis drawing together social material and biological approaches as well as national and international examples The book makes three main conceptual contributions reconceptualising disease as situated matters the spatial or topological analysis of situations and a reformulation of biopolitics Uniquely brings together conceptual development with empirically and politically informed work on infectious and zoonotic disease to produce a timely and important contribution to both social science and to policy debate

*Companion to Environmental Studies* Noel Castree, Mike Hulme, James D. Proctor, 2018-05-01 Companion to Environmental Studies presents a comprehensive and interdisciplinary overview of the key issues debates concepts approaches and questions that together define environmental studies today The intellectually wide ranging volume covers approaches in environmental science all the way through to humanistic and post natural perspectives on the biophysical world Though many academic disciplines have incorporated studying the environment as part of their curriculum only in recent years has it become central to the social sciences and humanities rather than mainly the geosciences The environment is now a keyword in everything from fisheries science to international relations to philosophical ethics to cultural studies The Companion brings these subject areas and their distinctive perspectives and contributions together in one accessible volume Over 150 short chapters written by leading international experts provide concise authoritative and easy to use summaries of all the major and emerging topics dominating the field while the seven part introductions situate and provide context for section entries A gateway to deeper understanding is provided via further reading and links to online resources Companion to Environmental Studies offers an essential one stop reference to university students academics policy makers and others keenly interested in the environmental question the answer to which will define the coming century

*Governing Disasters* S. Revet, J. Langumier, 2015-03-04 Based on extensive ethnographic and historical research conducted in diverse field locations this volume offers an acute analysis of how actors at local national and international levels govern disasters it examines the political issues at stake that often go unaddressed and demonstrates that victims of disaster do not remain passive

*Routledge Handbook of Global Health Security* Simon Rushton, Jeremy Youde, 2014-08-07 This new Handbook presents an overview of cutting edge research in the growing field of global health security Over the past decade the study of global health and its interconnection with security has become a prominent and rapidly growing field of research Ongoing debates question whether health and security should be linked which if any health issues should be treated as security threats what should be done to address health security threats and the positive and negative consequences of securitizing health In academic and policy terms the health security field is a timely and dynamic one and this handbook will be the first work comprehensively to address this agenda Bringing together the leading experts and commentators on health security issues from across the world the volume comprises original and cutting edge essays addressing the key issues in the field and also highlighting currently neglected avenues for future research The book intends to provide an accessible yet sophisticated introduction to the key topics and debates and is organised into four key parts Health Securities the fundamental conceptual issues historical links between health and security and the various ways of conceptualising health as a security issue Threats those health issues which have been most frequently discussed in security terms Responses the wide range of contemporary security driven responses to health threats Controversies the securitization of health its impact on rights and justice and the potential distortion of the global health agenda This book will be of great interest to students of global health security public health critical security studies and International Relations in general [International Encyclopedia of Geography, 15 Volume Set](#) Noel Castree, Michael F.
