Arduino Laboratory Manual:

Embedded Controllers Using C and Arduino James Fiore, 2016-03-21 This is the companion laboratory manual to accompany *Embedded Controllers Using C and Arduino*. The fifteen lab exercises range from introductory C programming concepts to interesting and useful device applications. Exercises cover topics such as basic digital and analog input/output programming and interfacing, multiplexing of LED displays, how to generate a true analog output, use of interrupts, and the like. Applications include a reaction timer, an event counter, motor drive using PWM, and an arbitrary analog waveform generator. Most exercises can be completed using just a computer, the low-cost Arduino Uno development board, and an array of small electronic parts such as LEDs, resistors, transistors, etc. Some exercises benefit from an oscilloscope. This is the print version of the on-line OER [Laboratory Manual - Embedded Controllers Using C and Arduino](#) Fiore, James M., *The Hands-on XBEE Lab Manual* Jonathan A Titus, 2012-07-02 Get the practical knowledge you need to set up and deploy XBee modules with this hands-on step-by-step series of experiments. *The Hands-on XBee Lab Manual* takes the reader through a range of experiments using a hands-on approach. Each section demonstrates module set-up and configuration, explores module functions and capabilities, and where applicable introduces the necessary microcontrollers and software to control and communicate with the modules. Experiments cover simple setup of modules, establishing a network of modules, identifying modules in the network, and some sensor interface designs. This book explains in practical terms the basic capabilities and potential uses of XBee modules and gives engineers the know-how that they need to apply the technology to their networks and embedded systems. Jon Titus KZ1G is a Freelance technical writer, editor, and designer based in Herriman, Utah, USA, and previously editorial director at Test.
