1. Community Ecology (100 points)

How do we define a community? An assemblage of interacting populations of different species.

- **Species richness**: the number of different species in a community.
- **Species evenness**: the relative abundance of each species in a community.
- **Species diversity**: a measure of the number of species and their relative abundance in a community.
- **Species turnover**: the rate at which species are replaced in a community.
- **Species pool**: the set of species that are available to interact in a community.

1. A species-rich community is more resilient to disturbance than a species-poor community. **True**
2. Biodiversity is a measure of the number of different species in a community. **True**
3. The number of living things in a community is called its **biomass**. **False**
4. Species richness is the number of different species in a community. **True**
5. The number of species in a community is called its **species richness**. **True**
6. Species evenness is a measure of the relative abundance of each species in a community. **True**
7. Species diversity is a measure of the number of species and their relative abundance in a community. **True**
8. Species turnover is the rate at which species are replaced in a community. **True**
9. Species pool is the set of species that are available to interact in a community. **True**
10. Species richness is the number of different species in a community. **True**
11. Species evenness is a measure of the relative abundance of each species in a community. **True**
12. Species diversity is a measure of the number of species and their relative abundance in a community. **True**
13. Species turnover is the rate at which species are replaced in a community. **True**
14. Species pool is the set of species that are available to interact in a community. **True**

2. A community is a group of interacting populations of different species.

Ssg- Human Biology 6E Student Study Guide Chiras,2008-02 Human

Biology Sixth Edition provides students with a clear and concise introduction to the general concepts of mammalian biology and human structure and function. With its unique focus on health and homeostasis, Human Biology enhances students' understanding of their own health needs and presents the scientific background necessary for students to think critically about biological information they encounter in the media. The completely revised content and exceptional new art and photos provide students with a more user-friendly text while excellent learning tools maximize comprehension of material.
