

Chapter 4 – Bioethics and the Clinical Encounter

A. Role of the patient

The patient's role in the clinical encounter is to become a virtuous patient. The patient is seen as a steward of life and health, responsible for making healthcare decisions that involve them. The virtuous patient is one who faces the moral challenges of illness, such as maintaining relationships, self-respect, realism, and courage. The virtues of charity, faith, hope, and fortitude can help the patient navigate these challenges and act well. These virtues also aid in making prudent decisions regarding medical and moral aspects of healthcare for overall human flourishing.

B. Vocation of the healthcare professional

The identity of a healthcare professional is seen as a vocation, a God given mission in life. Physicians, nurses, and other healthcare providers are called to imitate Jesus Christ by doing good and healing the sick. Their work goes beyond mere physical cure and includes caring for the whole person (physically, mentally, socially, and spiritually). Caring for the sick is considered an act of love for both the neighbor and God. Healthcare professionals are seen as good Samaritans, fulfilling a divine and salvific mission by being instruments of God's love for the suffering person. They are called to grow in faith, recognizing the presence of the Lord in those they serve.

C. The professional and patient relationship.

A relationship between two individuals, each with inherent worth and dignity. Mutual respect is crucial in this relationship, recognizing that the patient should not be reduced to a mere case or disease, and the professional should not be treated as a mere dispenser of medical knowledge. Both parties should be respected as persons and not used solely as means to an end.

- The healing relationship (Edmund Pellegrino) built upon the fact of illness, the act of profession, and the act of healing. The patient acknowledges their need for help, and the healthcare professional offers their expertise to alleviate the ailment. Trust and conscience form the foundation of this relationship, with the patient entrusting themselves to the conscience of the professional who can provide care and healing.
- Trust is essential for accurate diagnoses and effective treatment, requiring open and honest communication from the patient.
- Both the professional and patient are called to grow in virtues such as charity, patience, benevolence, truth, understanding, and prudence.
- Confidentiality is also emphasized as an important aspect of this relationship.

D. Confidentiality - know types of secrets and when they may be broken.

Confidentiality is a crucial aspect of the professional-patient relationship. Patients often disclose personal and private information to their healthcare providers, trusting that it will be used for their healing. Confidentiality arises from respect for the dignity of each person and the need to maintain professional relationships for the common good. May be broken to protect an individual whose life is at risk, such as specific threats or the transmission of
