

1. What are the three primary functions of the nervous system?

1. To receive information from the environment and the body.
2. To process this information and make decisions about what to do.
3. To send out instructions to the muscles and glands to carry out the decisions.

### 2. Neurons

What is a neuron? Describe the structure and function of a neuron.

A neuron is a specialized cell that transmits information. It consists of a cell body (soma), dendrites, and an axon.

### 3. Synapses

What is a synapse? Describe the structure and function of a synapse.

### 4. The Central Nervous System

What are the components of the central nervous system? Describe the structure and function of the brain, spinal cord, and meninges.

The central nervous system (CNS) consists of the brain and spinal cord. The brain is the control center of the body, and the spinal cord is the main communication pathway between the brain and the rest of the body.

What are the components of the peripheral nervous system? Describe the structure and function of the nerves and ganglia.

### 5. The Nervous System and Behavior

How does the nervous system control behavior? Describe the role of the brain, spinal cord, and nerves in controlling behavior.

The nervous system controls behavior by sending signals to the muscles and glands to carry out the decisions made by the brain.
