Biology And Wildlife Of The Mediterranean Region:

Biology and Wildlife of the Mediterranean Region Jacques Blondel, James Aronson, 1999 The Mediterranean is an outstanding hot spot of biological diversity It is exceptional not only for this but also because of its long history of interactions between its human inhabitants and the other fauna and flora of the region The cradle of many civilizations the Mediterranean region has been host to humans for thousands of years This book is the first to synthesise our current understanding of the ecology biology and geology of Mediterranean animals birds and plants and their habitats The authors focus on the unique historical determinants and spatial patterns of Mediterranean biodiversity In particular the dramatic impacts of long term human activities on the region s landscapes flora and fauna are considered This fascinating story will be of interest to researchers and students in ecology biology conservation and geography as well as to naturalists and ecotourists visiting this popular holiday region

Defining Community in Early Modern Europe Michael Halvorson, Karen E. Spierling, 2008 Numerous historical studies use the term community to express or comment on social relationships within geographic religious political social or literary settings yet this volume is the first systematic attempt to collect together important examples of this varied work in order to draw comparisons and conclusions about the definition of community across early modern Europe The chapters demonstrate the complex and changeable nature of community in an era more often characterized as a time of stark certainties and inflexibility As a result the volume contributes a vital resource to the ongoing efforts of scholars to understand the creation and perpetuation of communities and the significance of community definition for early modern Europeans

Natural Heritage Peter Howard, Thymio Papayannis, 2013-10-18 It has become more and more accepted that nature conservation is not possible without taking into account human activities Thus an integrated approach to both the natural and cultural heritage is being encouraged and developed Gathering a number of distinguished authors with diverse backgrounds from a religious leader to academics to conservation scientists the book aims to investigate the relationship between human beings and nature between nature and culture Looking at nature as heritage of the human race is a recognition both of the tremendous impacts both positive and negative that human activities have had on the natural environment as well as the acceptance of human responsibility for managing our planet in a sustainable and sensitive manner The texts included examine this interface between human beings and nature in specific places from the Everglades in Florida and Mont Saint Michel in Atlantic France to the UK Europe and the Mediterranean as well as on a theoretical basis and in the context of the international biodiversity conventions

The Mediterranean Region Jacques Blondel, 2010-01-28 This is a detailed illustrated and up to date study of the fauna flora landscapes coastal areas and seascapes of the entire Mediterranean Basin and the Sea itself Since the publication of the first edition in 1999 the field has advanced in significant ways and this revision is timely

The Birds of the Iberian

Peninsula Eduardo de Juana, Ernest Garcia, 2015-02-26 This authoritative title is the definitive avifauna covering the Iberian Peninsula The Iberian Peninsula is one of Europe's most ornithologically varied regions offering a host of regional specialities It includes famous birding hotspots such as the Coto Dona a wetlands mountainous areas such as the Picos de Europa and the Pyrenees the Mediterranean cork and holm oak forests of the southwest the migration crossroads of the Strait of Gibraltar and the steppe like plains of Extremadura and Alentejo Large numbers of birders from around Europe visit the region to see this wealth of winged wildlife but to date there has been no comprehensive regional avifauna in English Birds of the Iberian Peninsula is a national avifauna that fills this gap in the ornithological literature Full colour throughout the book begins with authoritative introductory chapters covering subjects such as geography climate habitats the history of Iberian ornithology and the composition of the avifauna The species accounts then cover every species recorded in mainland Spain the Balearic Islands Portugal Gibraltar and Andorra including the many vagrants For each species there is detailed treatment of distribution with maps of breeding and wintering ranges habitat selection population trends historical and current status migration and conservation

Encyclopedia of Islands Rosemary Gillespie, David Clague, 2009-08-19 Islands have captured the imagination of scientists and the public for centuries unique and rare environments their isolation makes them natural laboratories for ecology and evolution This authoritative alphabetically arranged reference featuring more than 200 succinct articles by leading scientists from around the world provides broad coverage of all the island sciences But what exactly is an island The volume editors define it here as any discrete habitat isolated from other habitats by inhospitable surroundings The Encyclopedia of Islands examines many such insular settings oceanic and continental islands as well as places such as caves mountaintops and whale falls at the bottom of the ocean This essential one stop resource extensively illustrated with color photographs clear maps and graphics will introduce island science to a wide audience and spur further research on some of the planet's most fascinating habitats

Principles and Methods in Landscape Ecology Almo Farina, 2022-05-25 This third thoroughly updated edition of a well received book presents the most complete collection of theories paradigms and methods utilized by the landscape sciences With the introduction of new ecosemiotic concepts and innovative managing procedures it offers a broad list of ecological ecosemiotic and cultural tools to investigate interpret and manage the environmental complexity according to a species specific individual based approach Readers will discover the importance of a landscape perspective to create strategic bridges between science and humanities favored by the holistic sight of sensorial visual acoustic olfactory tactile and thermal scapes Distributed in 10 chapters the content covers many aspects of the landscape sciences ranging from the description of fundamental theories principles and models originated by ecological approaches like source sink models island biogeography hierarchical theory and scale The ecosemiotic approaches like the eco field model the ecoscape paradigm and the general theory of resources are widely described and discussed A cultural approach to

landscape is utilized to focus on the heritage values of territories and their environmental identity This book written in an accessible and didactic style is particularly dedicated to undergraduate and graduate students but also scholars in ecology agroforestry urban planning nature design conservation and remediation Land practitioners farmers and policymakers can use this book as an authoritative guide to better understand the function and role of environmental systems according to a social economic integrated perspective *Sabkha Ecosystems* M. Ajmal Khan,Benno Böer,Münir Öztürk,Thabit Zahran Al Abdessalaam,Miguel Clüsener-Godt,Bilquees Gul,2014-05-12 Sustainable development is the key for the survival in 21st century The natural resources are finite and cannot be used with impunity because we are the custodian of these resources and have responsibility to pass these to the next generation This monumental task requires several major commitments and most important of them is to arrest population explosion which has already reached seven billion Natural resources like air to breath food to eat and water to drink and fossil fuel to maintain this life style are being overexploited Unrestrained consuming culture will accelerate undesired situation This situation will have more dire consequences in resource limited ecosystems like dry lands Given the severe scarcity of water ever increasing population and soil salinization out of the box solutions for the provision of food and clean energy is required to spare meager fresh water resources for conventional agriculture This volume contains a number of articles dealing with halophyte ecology bio geography ecophysiology hyper saline soils biofuels biosaline agriculture biosaline landscaping climate change mitigation and biodiversity It also contains the communication of innovative ideas such as the research into floating mangroves seagrass terraces as well as a World Halophyte Garden containing all known salt tolerant plant species It is hoped that the information provided will not only advance vegetation science but that it will truly generate more interdisciplinarity networking awareness and inspire farmers and agricultural and landscaping stakeholders to seriously engage in halophyte cash crop production in coastal hyper saline areas

The Long-Term Perspective of Human Impact on Landscape for Environmental Change and Sustainability

Anna Maria Mercuri,Assunta Florenzano,2019-11-19 The research studies included in this Special Issue highlight the fundamental contribution of the knowledge of environmental history to conscious and efficient environment conservation and management The long term perspective of the dynamics that govern the human climate ecosystem is becoming one of the main focuses of interest in biological and earth system sciences Multidisciplinary bio geo archaeo investigations into the underlying processes of human impact on the landscape are crucial to envisage possible future scenarios of biosphere responses to global warming and biodiversity losses This Special Issue seeks to engage an interdisciplinary dialog on the dynamic interactions between nature and society focusing on long term environmental data as an essential tool for better informed landscape management decisions to achieve an equilibrium between conservation and sustainable resource exploitation
