Biopolitics Of Security A Political Analytic Of Finitude Prio New Security Studies:

Biopolitics of Security Michael Dillon, 2015-02-11 Taking its inspiration from Michel Foucault this volume of essays integrates the analysis of security into the study of modern political and cultural theory Explaining how both politics and security are differently problematised by changing accounts of time the work shows how during the course of the 17th century the problematisation of government and rule became newly enframed by a novel account of time and human finitude which it calls factual finitude The correlate of factual finitude is the infinite and the book explains how the problematisation of politics and security became that of securing the infinite government of finite things It then explains how concrete political form was given to factual finitude by a combination of geopolitics and biopolitics Modern sovereignty required the services of biopolitics from the very beginning The essays explain how these politics of security arose at the same time changed together and have remained closely allied ever since In particular the book explains how biopolitics of security changed in response to the molecularisation and digitalisation of Life and demonstrates how this has given rise to the dangers and contradictions of 21st century security politics This book will be of much interest to students of political and cultural theory critical security studies and International Relations

The Molecularisation of Security Christopher Long, 2021-09-23 This book investigates the way that the molecular sciences are shaping contemporary security practices in relation to the governance of biological threats In response to biological threats such as pandemics and bioterrorism governments around the world have developed a range of new security technologies called medical countermeasures to protect their populations This book argues that the molecular sciences influence has been so great that security practices have been molecularised Focusing on the actions of international organisations and governments in the past two decades this book identifies two contrasting conceptions of the nature or inherent workings of molecular life as driving this turn On the one hand political notions of insecurity have been shaped by the contingent or random nature of molecular life On the other the identification of molecular life s constant biological dynamics supports and makes possible the development and stockpiling of effective medical countermeasures This study is one of the few to take seriously the conceptual implications that the detailed empirical workings of biotechnology have on security practices today This book will be of much interest to students of security studies bio politics life sciences global governance and International Relations in general

Surveillance, Privacy and Security Michael Friedewald, J. Peter Burgess, Johann Čas, Rocco Bellanova, Walter Peissl, 2017-03-16 This volume examines the relationship between privacy surveillance and security and the alleged privacy security trade off focusing on the citizen s perspective Recent revelations of mass surveillance programmes clearly demonstrate the ever increasing capabilities of surveillance technologies The lack of serious reactions to these activities shows that the political will to implement them appears to be an unbroken trend The resulting move into a surveillance society is however contested for many reasons Are the resulting infringements of privacy and other human rights compatible with democratic societies Is

security necessarily depending on surveillance Are there alternative ways to frame security Is it possible to gain in security by giving up civil liberties or is it even necessary to do so and do citizens adopt this trade off This volume contributes to a better and deeper understanding of the relation between privacy surveillance and security comprising in depth investigations and studies of the common narrative that more security can only come at the expense of sacrifice of privacy The book combines theoretical research with a wide range of empirical studies focusing on the citizen s perspective It presents empirical research exploring factors and criteria relevant for the assessment of surveillance technologies The book also deals with the governance of surveillance technologies New approaches and instruments for the regulation of security technologies and measures are presented and recommendations for security policies in line with ethics and fundamental rights are discussed This book will be of much interest to students of surveillance studies critical security studies intelligence studies EU politics and IR in general A PDF version of this book is available for free in open access via www.tandfebooks.com It has been made available under a Creative Commons Attribution Non Commercial 3 0 license

Security, Emancipation and the Politics of Health Joao Nunes, 2013-10-01 This book develops a new theoretical framework for the study of security issues and applies this to the case of health Building on the work of the Welsh School of Security Studies and drawing on contributions from the wider critical security literature the book provides an emancipatory perspective on the health security nexus one which simultaneously teases out its underlying political assumptions assesses its political effects and identifies potential for transformation *Security Emancipation and the Politics of Health* challenges conventional wisdom in the field of health and international politics by conceiving of health as a fundamentally political issue and not merely as a medical problem demanding technical solutions and arrangements The book shows how political processes of representation underpin notions of health and disease through an examination of three key areas the linkages between immigration and the fear of disease colonial medicine and the health as a bridge for peace literature In order to successfully carry out this political investigation of health the book develops an innovative theoretical framework inspired by the idea of security as emancipation which goes beyond the existing emancipatory literature in security studies This book will be of much interest to students of critical security studies health politics sociology and IR in general

Transformations of Security Studies Gabi Schlag, Julian Junk, Christopher Daase, 2015-10-30 This volume brings together a group of distinguished scholars to engage in a dialogue on key developments in the study of security The book provides a comprehensive overview of theoretical empirical and methodological developments within security studies whose political and societal importance has grown significantly in recent years By bringing together scholars who hold differing perspectives on security this volume provides insights into a variety of approaches and their newest developments including mainstream as well as heterodox perspectives on security Thus it aims to build bridges of communication between different camps by initiating a dialogue on the identity and diversity of security studies It does so in three parts The first part of the book includes paradigmatic approaches to security that are

closely connected to major debates in International Relations such as realism institutionalism constructivism as well as approaches to the culture ethics of security and critical security studies The second part places emphasis on the broadening and deepening of the concept of security in recent decades It discusses key empirical frontiers including the continued centrality of the state the link between democracy and security environmental security as well as financial security The third part of the book presents various methodological approaches to the question of security and peace It provides an overview of new approaches such as the visual turn quantifying security and method combinations This book will be of much interest to students of critical security studies international relations and research methods Handbook of New Security Studies J. Peter Burgess, 2010-01-22 This new Handbook gathers together state of the art theoretical reflection and empirical research by a group of leading international scholars relating to recent transformations in the field of security studies *Security, Technology and Global Politics* Mark Lacy, 2014-02-05 This book analyses some of the key problems explored in Paul Virilio's theorising on war and security Paul Virilio has developed a provocative series of writings on how modern societies have shaped the acceleration of military security technologies and how technologies of security and acceleration have transformed society economy and politics His examination of the connections between geopolitics war speed technology and control are viewed as some of the most challenging and disturbing interventions on the politics of security in the twenty first century interventions that help us understand a world that confronts problems that increasingly emerge from the desire to make life safer faster networked and more efficient *Security Technology and Global Politics* examines some of the key concepts and concerns in Virilio's writings on security society and technology endo colonization fear and the war on terror cities and panic cinema and war ecological security and integral accidents universities and ideas of progress Critics often point to an apocalyptic or fatalistic element to Virilio's writings on global politics but this book challenges this apocalyptic reading of Virilio's work suggesting that while he doesn't provide us with easy solutions to the problems we face the political force in Virilio's work comes from the questions he leaves us with about speed security and global politics in times of crisis terror and fear This book will be of interest to students of critical security studies political theory sociology political geography cultural studies and IR in general **Security, Emancipation and the Politics of Health** João Nunes, 2014 This book develops a new theoretical framework for the study of security issues and applies this to the case of health Building on the work of the Welsh School of Security Studies and drawing on contributions from the wider critical security literature the book provides an emancipatory perspective on the health security nexus one which simultaneously teases out its underlying political assumptions assesses its political effects and identifies potential for transformation *Security Emancipation and the Politics of Health* challenges conventional wisdom in the field of health and international politics by conceiving of health as a fundamentally political issue and not merely as a medical problem demanding technical solutions and arrangements The book shows how political processes of representation underpin notions of health and disease through an examination of three

key areas the linkages between immigration and the fear of disease colonial medicine and the health as a bridge for peace literature In order to successfully carry out this political investigation of health the book develops an innovative theoretical framework inspired by the idea of security as emancipation which goes beyond the existing emancipatory literature in security studies This book will be of much interest to students of critical security studies health politics sociology and IR in general

Security Expertise Trine Villumsen Berling, Christian Bueger, 2015-04-10 This volume brings together scholars from different fields to explore the power consequences and everyday practices of security expertise Expertise mediates between different forms of knowledge scientific and technological legal economic and political knowledge This book offers the first systematic study of security expertise and opens up a productive dialogue between science and technology studies and security studies to investigate the character and consequences of this expertise In security theory the study of expertise is crucial to understanding whose knowledge informs security making and to reflect on the impact and responsibility of security analysis In science and technology studies the study of security politics adds a challenging new case to the agenda of research on expertise and policy The contributors investigate cases such as academic security studies security think tanks the collaboration between science anthropology and the military transnational terrorism and the ethical consequences of security expertise Together they challenge our understanding of how expertise works and what consequences it has for security politics and international relations This book will be of particular interest to students of critical security studies sociology science and technology studies and IR security studies in general

Citizenship and Security Xavier Guillaume, Jef Huysmans, 2013-08-15 This book engages the intense relationship between citizenship and security in modern politics It focuses on questions of citizenship in security analysis in order to critically evaluate how political being is and can be constituted in relation to securitising practices In light of contemporary issues and events such as human rights regimes terrorism identity control commercialisation of security diaspora and border policies this book addresses a citizenship deficit in security studies The chapters introduce several key political themes that characterise the interplays between citizenship and security changes in citizenship regimes the renewed insecurity of citizenship state relations the emerging ways by which the political and national communities are crafted and the ways democratic societies and regimes react in times of insecurity Approaching citizenship as both a governmental practice and a resource of political contestation the book aims to highlight what political challenges and contestations are created in situations where security intensely meets citizenship today This book will be of interest to scholars of security studies and security politics citizenship studies and international relations
