

The biopsychosocial model of disease

My long-term health conditions are biological in origin, but the impact has been felt physically, psychologically and socially. My long-term health condition can't be treated just through the biological medical model alone. . . .

“The medical support keeps me alive, but it is the psychological and social support that enables me to live.”

Biosocial Model

Matt DeLisi, Kevin M. Beaver

Biosocial Model:

Aristotle's Biopsychosocial Model of Psychology and Conceptualization of Character Daniel E. Lee, Psy.D.,2011-09-01 Aristotle formulated a multidimensional biopsychosocial and dynamic model of psychology and conceptualization of character that prefigured and is congruent with many aspects of contemporary models of psychology Since ancient times Aristotle s work has provided an elaborate detailed and highly operationalized model of psychology and conceptualization of character that is in congruence with and or conceptually related to theoretical operationally defined and empirically researched constructs found in contemporary clinical psychology The various constitutive elements of Aristotle s model of psychology e g sensation perception judgment wish biologically based passions habituated emotional responses opinion will imagination memory recollection and rational thought are reviewed and explicated and an explanation is offered as to how these constitutive elements are woven together to form his conceptualization of character **Comprehensive Handbook of Personality and Psychopathology, Personality and Everyday Functioning** Jay C. Personality, Social Skills, and Psychopathology David G. Gilbert, James J. Connolly, 2013-11-11 This book presents an introduction to the study of relationships among personality social skills and psychopathology Although research findings during the last decade have made it clear that the relationships among these variables are almost always complex and multiply determined many clinicians and theoreticians have not incorporated such complexities into their models of human behavior and therapeutic intervention This discrepancy between clinical theory and research based findings has been of special concern to us because we have been both empirically oriented academic researchers and practicing clinicians It is our belief that clinical theory related to personality social skills and psychopathology can be enriched by research findings from a wide range of fields from human genetics temperament and personality to family systems affect psychophysiology and learning This book is divided into an introductory chapter and three sections The introductory chapter provides an overview of the issues in the field compares models and provides suggestions for further integration and articulation of concepts related to personality social skills and psychopathology The book's first section presents state of the art general models of interactions among personality social skills and psychopathology Connolly opens this section with a chapter that reviews longitudinal findings indicating that personality traits predict the onset of psychopathology and marital distress The etiology of these and related findings is the subject of other chapters in this section
