Java Coding with Android Programming 4 Donggeun Jung,2019-01-03 What is this textbook This is a lecture on coding and creating apps and games that can be installed and run on Android phones This is a lecture that will be helpful to everyone from performance evaluation of middle school and high school students to job seekers who want to become a professional programmer You can study the theory practice and development of your apps at the same time and have fun coding You can also create your own apps and install them on your phone Why should I learn coding The purpose of learning coding is to improve the ability to think logically Making a command to a computer is a lot different from talking to a person Because the computer can understand only computer programming language Do ordinary people who do not care about coding have to learn coding Talking to a computer is a lot of patience but if you have exactly delivered the command it will be done People make mistakes but computers do not make mistakes The Alpha Go s movement which looked like a mistake in the match with Lee Sedol in March 2016 was actually a thoroughly calculated strategy In this sense it is helpful for ordinary people to learn coding to live their life So how do I study to learn coding No matter what kind of discipline practice is important Knowing only coding theory does not help you to grow your logic Repeatedly doing many exercises will improve your ability to think The human brain is similar to muscles Muscle should continue exercise to develop further When weighing in a gym muscles grow and astronauts who travel on a car have less muscle Likewise if you want to develop your brain you should do a lot of thinking exercises That is why theories should be learned at a minimum and lots of practice are better If you make many examples in this manual you can understand what the coding grammar means You can naturally improve your logic while making various examples Is not coding useful in real life just educational It is worth studying just to improve the logic but it would be better if it helps the real life Currently the most common tool for coding is scratch This textbook is a little different In this tutorial you will develop various Android apps by Java language You can study coding create your own apps and install them on your smartphone Also if you want to become a programmer like the author you can learn the real IT techniques Should studying be boring and difficult There are a lot of people who think that study hard makes good memory I do not mean to say wrong but if I study it I think learning to have fun makes feel easy and concentration is higher Maybe you have heard this sentence A genius can not follow a hard worker and a hard worker can not follow who enjoy he s work This tutorial will help you learn coding and smartphone application development by making simple games and apps Why do I have to learn

the Java language among various computer languages Among many computer languages the C series takes up 50 percent of the market C C C and Java are C series languages That s why learning the Java language is like learning C and C Scratch or Python is easy to learn but after learning an easy langue you may feel difficult to learn other languages The C series language is difficult to learn at first but after you get used to it you can easily learn other languages I don t know anything about coding Is it difficult to develop an Android application I made this book even beginners can study alone and develop smartphone apps As you read and practice making sample apps through the textbook you will find yourself becoming an expert

Eventually, you will no question discover a extra experience and success by spending more cash. still when? accomplish you assume that you require to get those all needs in the manner of having significantly cash?
