Coding style

Spacing

- Use soft-tabs with a two space indent. Spaces are the only way to guarantee code renders the same in any person's environment.
- Put spaces after `:` in property declarations.
- Put spaces before `{` in rule declarations.
- Put line breaks between rulesets.
- When grouping selectors, keep individual selectors to a single line.
- Place closing braces of declaration blocks on a new line.
- Each declaration should appear on its own line for more accurate error reporting.

Formatting

- Use hex color codes `#eee` unless using `rgba()`.
- Use `//` for comment blocks (instead of `/* */`).
- Avoid specifying units for zero values, e.g., `margin: 0;` instead of `margin: 0px;`
- Strive to limit use of shorthand declarations to instances where you must explicitly set all the available values.
