The Little Book of Second Mentions Juliet & Matthew Maguire, 2025-08-19 To avoid repetition journalists often try to be creative when referencing something for the second time in a news article for example Boris Johnson at the first mention could become the blond buffoon at the second mention while Donald Trump could become the bloviating billionaire with extra points for alliteration Once you see one you start seeing them everywhere and it becomes addictive This grammatical tool christened elegant variation is used by journalists trying to avoid making their articles boring through repetition but its use is not an exact science and the results can sometimes be hilarious Every day the Second Mentions team is sent examples of these spotted by journalists who are keen to point out shining examples used by their fellow writers or sometimes claiming responsibility for their own efforts and non journalists who enjoy the simple pleasure of happening upon these second mentions while reading news articles And so from distended dachshunds to marine marauders and from 5ft 1in nonagenarians to pear shaped money guzzlers The Little Book of Second Mentions is the perfect gift for everyone with an inventive passion for the English language from those with a general interest in current affairs to those working in the media

Blessings of Disaster Michel Bruneau,2022-11-08 Are we doomed As individuals certainly eventually inevitably But as a species As a civilization Leading catastrophe engineer Michel Bruneau thinks perhaps not The Blessings of Disaster draws on knowledge from multiple disciplines to illustrate how our civilization s future successes and failures in dealing with societal threats be they pandemics climate change overpopulation monetary collapse and nuclear holocaust can be predicted by observing how we currently cope with and react to natural and technological disasters Maybe most importantly this entertaining and often counter intuitive book shows how we can think in better ways about disasters to strengthen and extend our existence as both individuals and as a species When it comes to rare extreme events such as earthquakes hurricanes floods tornados volcanic eruptions technological accidents terrorist attacks pandemics and even existential threats it is in our nature to set ourselves up for disasters because the gamble may be worth it But only maybe The Blessing of Disaster is the very real story of the relationship between humans and disasters and it s not a simple one Bringing together his decades long career spanning the globe as an earthquake and disaster engineer detailed catastrophe case studies from extreme events like Japan s Kobe earthquake and category 5 hurricanes in the American South along with thoughtful and practical solutions Bruneau provides a thorough examination of the structural challenges that face today s and tomorrow s world How we cope with today s threats is indicative of what the future holds Contrary to popular forecasts it is not all gloom and doom but some of it definitely is

Options for Reforming the Railway Sector: A Comparison of Sweden, the UK, Japan and Germany Adam Fularz, Railways were often described as an example of a natural monopoly Their market structure was historically constructed as a monopoly and strongly influenced by tight governmental regulation Railways have been one of the most heavily regulated sectors of the economy almost all the time throughout its history

The China-Japan Conflict over the Senkaku/Diaoyu Islands Anna Costa,2017-09-27 This book examines the foreign and security policies adopted by China and Japan since the 1970s in their competition over the Senkaku Diaoyu Islands in the East China Sea It charts the development of a dispute that has become a potential flashpoint for conflict between the two countries The book explains that while increasing nationalism in both China and Japan helps to fuel and sustain the dispute a

key factor is that the leaderships in both countries find competition over the islands to be a convenient vehicle supporting their wider approach to foreign and security policy which is becoming increasingly assertive and potentially belligerent

On Being Unreasonable Kirsty Sedgman, 2023-02-14 Manners order and respect these are all ideals we subscribe to In opposed positions we ought to be able to agree to disagree Today's world is built from structures of standards and reason but it is imperative to ask who constructed these norms and why We are more divided than ever before along lines of race gender class disability and it's time to question who benefits the most What if our propensity to measure human behaviour against rules and reason is actually more problematic than it might seem Kirsty Sedgman shows how power dynamics and the social biases involved have resulted in a wide acceptance of what people should and shouldn't do but they create discriminatory realities and amount to a societal facade that is dangerous for genuine social progress From taking the knee to breastfeeding in public from neighbourhood vigilantism to the Colston Four and exploring ideas around ethics justice society and equality along the way Sedgman explores notions of civility throughout history up to now *On Being Unreasonable* mounts a vital and spirited defence of why and how being unreasonable can help improve the world It examines and parses the pros and cons of our rules around reason but leaves us with the rousing question What if behaving unreasonably at times might be the best way to bring about meaningful change that is long overdue

Supercities On, Under, and Beyond the Earth Jeff Dondero, 2020-02-08 As more and more people inhabit the Earth and live longer on it Super Cities will explode with populations of 20 30 even 100 millions or more But how will these cities accommodate such masses Who will build them and where How can they be sustained and their inhabitants provided for Here Jeff Dondero imagines the super cities of the future and explores the ways in which they can be sustainably built how transportation will move masses of people without cars how people will be fed and where waste will go and how we will move to cities underground under the sea in the atmosphere into space and on to other planets It describes some of the smart systems for buildings and homes and some of the new ways food and materials enough for such masses will be supplied Will super cities be the answer to our bursting population And if they will how can we best sustain and supply them Dondero offers suggestions and a blueprint for the future
