Controlling Aircraft—From Humans to Autonomous Systems

Aharon David,2024-09-25 Paris June 18 1914 Crowds gathered at the Concours de la S curit en A roplane to witness 21 year old Lawrence Sperry demonstrate his newly invented gyroscopic stabilizer With his hands in the air the device flew his Curtiss C 2 flying boat Only a decade after the Wright brothers initial flight the first n autopilot made its public debut As impressive as this public demonstration was it was merely a humble although spectacular moment of foreshadowing Even today 110 years later the process of automating aspects of flight has not yet fully concluded leading to deteriorating insight into the automatic behavior of aircraft systems and even the waning of human instincts and intuition Controlling Aircraft From Humans to Autonomous Systems Rise of the Machines covers the distancing of humans from their flying machines through more than a century long process of assisting systems introduction the positive and negative consequences of this process and mitigation solutions for the negative consequences Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2024020>

Management Systems **Helicopter Flight Dynamics** Gareth D. Padfield, 2018-11-19 The Book The behaviour of helicopters and tiltrotor aircraft is so complex that understanding the physical mechanisms at work in trim stability and response and thus the prediction of Flying Qualities requires a framework of analytical and numerical modelling and simulation Good Flying Qualities are vital for ensuring that mission performance is achievable with safety and in the first and second editions of Helicopter Flight Dynamics a comprehensive treatment of design criteria was presented relating to both normal and degraded Flying Qualities Fully embracing the consequences of Degraded Flying Qualities during the design phase will contribute positively to safety In this third edition two new Chapters are included Chapter 9 takes the reader on a journey from the origins of the story of Flying Qualities tracing key contributions to the developing maturity and to the current position Chapter 10 provides a comprehensive treatment of the Flight Dynamics of tiltrotor aircraft informed by research activities and the limited data on operational aircraft Many of the unique behavioural characteristics of tiltrotors are revealed for the first time in this book The accurate prediction and assessment of Flying Qualities draws on the modelling and simulation discipline on the one hand and testing practice on the other Checking predictions in flight requires clearly defined mission tasks derived from realistic performance requirements High fidelity simulations also form the basis for the design of stability and control augmentation systems essential for conferring Level 1 Flying Qualities The integrated description of flight dynamic modelling simulation and flying qualities of rotorcraft forms the subject of this book which will be of interest to engineers practising and honing their skills in research laboratories academia and manufacturing industries test pilots and flight test engineers and as a reference for graduate and postgraduate students in aerospace engineering

Operational Safety for Aviation Managers John Frearson, 2024-11-28 Despite the vast amount of work building the foundations of safe operations aviation accidents still happen and prior to many accidents and other safety related events there was unexpressed or ignored disquiet as the last minute approached the last minute being that time when there is no longer time for discussion or analysis only safety first action This book aims at the assurance of better outcomes from these time critical situations whose genesis lies in the time period immediately preceding the last minute This assurance of better outcomes can best be assured by enabling operational managers to adopt new paradigms in the development of SOPs building the right culture and implementation of training programs relevant to good decision making required as the last minute approaches This book examines the development of the foundations for aviation safety the things that give foundational support for safety to pilots in particular but over which line pilots may have little knowledge or day to day control It provides a history of time critical safety related events providing the foundation for the understanding of the reasons why pilot inactivity indifference fixation and incapacitation can so pervade the lead up to the last minute as to leave the safe continuation of the flight resting on prompt remedial action The role of doubt how it is expressed and how it is heard is another central thread Finally the book addresses the role of flight data analysis as a valuable management tool Written for aviation managers line flight crews and those in similar operational roles in aviation related operations this book and its informal discussion style should appeal and communicate across national age experience and language boundaries to create a safer operational environment
