Manmade Breast Cancers Zillah Eisenstein, 2018-08-06 A new understanding of humanity and feminism from the starting point of breast health is the ultimate goal of Zillah Eisenstein's political memoir of her family's experience with breast cancer The well known feminist author argues that politics always needs the personal and that the personal is never enough on its own Her return to the personal side of the political combines

the two for a radicalized way of seeing viewing and knowing The author strives to bring together a critique of environmental damage and the health of women s bodies gain perspective on the role race plays as a factor in breast cancers and in political agendas link prevention and treatment and connect individual support and political change Eisenstein was sixteen when her forty five year old mother successfully battled breast cancer Her two sisters Sarah and Giah were in their twenties when they were diagnosed but neither of them survived She received her own diagnosis when she was forty Despite her family history however Eisenstein rejects the simple argument that genes are simply determining rather than liable to influence by external factors She also questions the dominance of the theory that breast cancer is caused by high lifetime exposure to estrogen Instead she views breast cancer as an environmental disease best understood in terms of ecological racial economic and sexual influences on individual women She uses the term manmade to indicate not only industrial carcinogens and other cultural causes but also the male dominated and defined scientific practices of research and treatment In response Manmade Breast Cancers offers a retelling of the meaning of breast cancer and a discussion of universal feminist issues about the body The author says she writes to discover a more just globe which will treasure the health of all of our bodies The emotional depth and intellectual breadth of her argument adds new dimensions to how we understand breast cancer **Breast**
