Bayesian Multiple Target Tracking Second Edition Bayesian Multiple Target Tracking Second Edition:

Bayesian Multiple Target Tracking, Second Edition Lawrence D. Stone, Roy L. Streit, Thomas L. Corwin, Kristine L. Bell, 2013-12-01 This second edition has undergone substantial revision from the 1999 first edition recognizing that a lot has changed in the multiple target tracking field One of the most dramatic changes is in the widespread use of particle filters to implement nonlinear non Gaussian Bayesian trackers This book views multiple target tracking as a Bayesian inference problem Within this framework it develops the theory of single target tracking multiple target tracking and likelihood ratio detection and tracking In addition to providing a detailed description of a basic particle filter that implements the Bayesian single target recursion this resource provides numerous examples that involve the use of particle filters With these examples illustrating the developed concepts algorithms and approaches the book helps radar engineers develop tracking solutions when observations are non linear functions of target state when the target state distributions or measurement error distributions are not Gaussian in low data rate and low signal to noise ratio situations and when notions of contact and association are merged or unresolved among more than one target

Practical Geolocation for Electronic Warfare Using MATLAB Nicholas O'Donoughue, 2022-06-30 This text explores the practical realities that arise from the employment of geolocation for electronic warfare in real world systems including position of the target errors in sensor position orientation or velocity and the impact of repeated measurements over time The problems solved in the book have direct relevance to accurately locating and tracking UAVs planes and ships As a companion volume to the author's previous book Emitter Detection and Geolocation for Electronic Warfare Artech House 2019 this book goes in depth on real world complications that include working within and converting between different coordinate systems incorporation of prior information about targets sensor uncertainties the use of multiple snapshots over time and estimating the current position and velocity of moving targets The e book version described here includes several links to software and videos that can be downloaded from the publicly available Git repository The book also includes all MATLAB code necessary to develop novel algorithms that allow comparisons to classical techniques and enable you to account for errors in timing position velocity or orientation of the sensors With its unique and updated coverage of detailed geolocation techniques and data and easy linkable access to additional software and videos this is a must have book for engineers and electronic warfare practitioners who need the best information available on the development or employment of geolocation algorithms It is also a useful teaching resource for faculty and students in engineering departments covering RF signal processing topics as well as anyone interested in novel applications of SDRs and UAVs

Analytic Combinatorics for Multiple Object Tracking Roy Streit,Robert Blair Angle,Murat Efe,2020-11-26 The book shows that the analytic combinatorics AC method encodes the combinatorial problems of multiple object tracking without information loss into the derivatives of a generating function GF The book lays out an easy to follow path from theory to practice and includes salient AC application examples Since GFs are not widely utilized amongst the tracking community the book takes the reader from the basics of the subject to applications of theory starting from the simplest problem of single object tracking and advancing chapter by chapter to more challenging multi object tracking problems Many established tracking filters e g Bayes Markov PDA JPDA IPDA JIPDA CPHD PHD multi Bernoulli MBM LMBM and MHT are derived in this manner with simplicity economy and considerable clarity The AC method gives significant and fresh insights into the modeling assumptions of these filters and thereby also shows the potential utility of various approximation methods that are well established techniques in applied mathematics and physics but are new to tracking These unexplored possibilities are reviewed in the final chapter of the book **Introduction to Bayesian Tracking and Particle Filters** Lawrence D.

Stone,Roy L. Streit,Stephen L. Anderson,2023-05-31 This book provides a quick but insightful introduction to Bayesian tracking and particle filtering for a person who has some background in probability and statistics and wishes to learn the basics of single target tracking It also introduces the reader to multiple target tracking by presenting useful approximate methods that are easy to implement compared to full blown multiple target trackers The book presents the basic concepts of Bayesian inference and demonstrates the power of the Bayesian method through numerous applications of particle filters to tracking and smoothing problems It emphasizes target motion models that incorporate knowledge about the target s behavior in a natural fashion rather than assumptions made for mathematical convenience The background provided by this book allows a person to quickly become a productive member of a project team using Bayesian filtering and to develop new methods and techniques for problems the team may face **Distributed Sensor Networks** S. Sitharama Iyengar,Richard

R. Brooks,2016-04-19 The best selling Distributed Sensor Networks became the definitive guide to understanding this far

reaching technology Preserving the excellence and accessibility of its predecessor Distributed Sensor Networks Second Edition once again provides all the fundamentals and applications in one complete self contained source Ideal as a tutorial for Nonlinear Gaussian Filtering : Theory, Algorithms, and Applications Huber, Marco,2015-03-11 By restricting to Gaussian distributions the optimal Bayesian filtering problem can be transformed into an algebraically simple form which allows for computationally efficient algorithms Three problem settings are discussed in this thesis 1 filtering with Gaussians only 2 Gaussian mixture filtering for strong nonlinearities 3 Gaussian process filtering for purely data driven scenarios For each setting efficient algorithms are derived and applied to real world problems Signal Processing for Joint Radar Communications Kumar Vijay Mishra,M.
