Of Bridges Thomas Harrison, 2021-04 Always wrote Philip Larkin it is by bridges that we live Bridges represent our aspirations to connect to soar across divides And it is the unfinished business of these aspirations that makes bridges such stirring sights especially when they are marvels of ingenuity A rich compendium of myths superstitions literary and ideological figurations as well as architectural and musical illustrations Of Bridges organizes a poetic and philosophical history of bridges into nine thematic clusters Leaping in lucid prose between seemingly unrelated times and places Thomas Harrison gives a panoramic account of the diverse meanings and valences of human bridges questioning why they are built and where they lead He investigates bridges as flashpoints in war and the mega bridges of our globalized world He probes links forged by religion between life s transience and eternity and the consolidating ties of music illustrated in a case study of the blues He illuminates the real and symbolic crossings facing migrants each day and the affective connections that make persons and societies cohere In fine and intricate readings of literature philosophy art and geography Harrison engages in a profound reflection on how bridges form and transform cultural communities Interdisciplinary and deeply lyrical Of Bridges is a mesmerizing vertiginous tale of bridges both visible and invisible both lived and imagined
