influential today Sigmund Freud's psychoanalysis had developed the idea of understanding the mind through dialogue between patient and analyst The behaviorism of Ivan Pavlov and John Watson had focused on comprehending the mind through behaviors that could be measured trained and changed Maslow however generated new ideas forging what he called positive or humanistic psychology His argument was that humans are psychologically motivated by a series of hierarchical needs starting with the most essential first Maslow thought it important for the advancement of psychology to identify group and rank these needs in terms of priority His belief in the value of this third way was important in leading those who studied psychology to redefine the discipline and so see it in new ways

Maslow, 2013-12-06 The present paper is an attempt to formulate a positive theory of motivation which will satisfy these theoretical demands and at the same time conform to the known facts clinical and observational as well as experimental It derives most directly however from clinical experience This theory is I think in the functionalist tradition of James and Dewey and is fused with the holism of Wertheimer Goldstein and Gestalt Psychology and with the dynamicism of Freud and Adler This fusion or synthesis may arbitrarily be called a general dynamic theory It is far easier to perceive and to criticize the aspects in motivation theory than to remedy them Mostly this is because of the very serious lack of sound data in this area I conceive this lack of sound facts to be due primarily to the absence of a valid theory of motivation The present theory then must be considered to be a suggested program or framework for future research and must stand or fall not so much on facts available or evidence presented as upon researches to be done researches suggested perhaps by the questions raised in this paper
