A Theory Of Public Opinion:

A Theory of Public Opinion Francis Wilson, 2017-07-12 This book traces the emergence of the ideas and institutions that evolved to give people mastery over their own destiny through the force of public opinion The Greek belief in citizen participation is shown as the ground upon which the idea of public opinion began and grew For Wilson public opinion is an orderly force contributing to social and political life Wilson appraises the influence of modern psychology and the slow appearance of methodologies that would enable people not only to measure the opinions of others but to mold them as well He examines the relation of the theory of public opinion to the intellectuals the middle class and the various revolutionary and proletarian movements of the modern era The circumstances in which the individual may refuse to follow the opinions of the experts are succinctly and movingly analyzed This book is a historical and philosophical evaluation of a concept that has played a decisive part in history and whose overwhelming force is underestimated The author's insight brings an understanding that is invaluable at a time when public opinion the force developed to enable the ruled to restrain their rulers has become controllable Attempts to manipulate it are made by those who would impose their will upon their fellow men

Public Opinion Bernard C. Hennessy, Erna Hennessy, 1981 **The Public Opinion Process** Irving Crespi, 2013-11-05 What is public opinion How can we best study it This work presents a process model that answers these questions by defining public opinion in a way that also identifies an approach to studying it The model serves as a framework into which the findings of empirical research are integrated producing a comprehensive understanding of public opinion that encompasses the congeries of middle range theories that have emerged from empirical research The three dimensional process model and the way it is explicated satisfies the diverse and sometimes divergent needs and interests of political scientists sociologists social psychologists and communication specialists who study public opinion This is achieved by clearly differentiating and interrelating the following individual opinions the judgmental outcomes of a process in which attitudinal systems comprised of beliefs values interests and feelings function as intervening variables that direct and structure perceptions of public issues collective opinions the outcomes of communication from which mutual awareness emerges and that integrate separate individual opinions into a significant social force and political roles of collective and individual opinions the outcomes of the extent to which collective and individual opinions have achieved legitimacy as the basis for governing a people DON'T USE THIS PARAGRAPH FOR GENERAL CATALOGS Each dimension of the model has its corresponding subprocess transactions between individuals and their environments communications among individuals and collectives and political legitimation of public opinion Since the process model is by definition interactional none of the three dimensions has theoretical or sequential priority over the others Instead of treating the psychological political and sociological aspects of public opinion as separate stages of an unidirectional process the three aspects are modeled as dimensions of a complex ongoing system in continuous interaction with each other This conceptualization satisfies the need for a truly interdisciplinary theory in that it

demands that each dimension be studied in terms of its defining sub process It also avoids the twin errors of reductionism and reification in the study of public opinion **Social Mentality and Public Opinion in China** Fanbin Zeng,2023-02-24

This book explores the relationship between social mentality public opinion media and other factors through mixed methods in China especially since the 21st century The book deploys qualitative and quantitative research and adopts a multi disciplinary perspective and diverse research methods The studies are built on and contribute to the burgeoning literature seeking to anatomise the relationship between social mentality media and public opinion from the point of view of sociology and communication It also aims to explore how media can be used to appease public opinion As the first systematic study of the interconnection between social mentality and public opinion this book provides empirical support and a theoretical framework for both areas It will thus be a great read for students and scholars of communication sociology and social psychology especially for those with a focus on China and new media Public Opinion, the Press, and Public Policy J David Kennamer,1994-09-30 This contributors volume examines the ways in which public opinion affects public policy via the news media Insofar as the media represent or characterize the public they represent or frame policy questions and decisions They convey accurately or inaccurately the overall climate of public opinion to policymakers and are themselves used as evidence of public opinion by policymakers This work draws together theory and original research concerning the role of the press in shaping public policy and links the fields of journalism mass communications and political science This work will be of interest to scholars and practitioners in journalism communications studies public policy government and political science

Public Opinion and the Penalty for Murder Homicide Review Advisory Group (HOMRAG),2011-12-08 The Homicide Review Advisory Group HomRAG was set up in 2004 to run alongside the work of the Law Commission which was reviewing aspects of the law on murder This multidisciplinary group was convened on the initiative of Sir Louis Blom Cooper QC and Professor Terence Morris and was initially chaired by the late Very Reverend Colin Slee Dean of Southwark and now by Sir Louis In essence the group is concerned with promoting a just law of murder As part of this aim and in view of developments in Parliament in late 2011 and continuing into 2012 concerning sentencing and the use of mandatory sentences in particular HomRAG has published its first report for consideration by law makers and other interested parties Harking back to the abolition of capital punishment the group argue that the mandatory life sentence for murder is both unjust and outdated a compromise arrived at in the 1960s in order to ensure that abolition of the death penalty made its way through both Houses of Parliament Neither it nor the present system of tariff setting allow for sentences which match the seriousness of individual crimes so that e g a single mercy killing attracts the same penalty as that for a murder which is part of a course of serial killings Further the indefinite and misleading nature of the life sentence which may or may not involve a life spent in prison is both unjust and incomprehensible to even better informed lay people Building on modern research which shows that the public and public opinion are nowadays by no means averse to such a change the report urges that the time has come for a

move to fixed sentences for murder as with any other individual crime so that the exact circumstances of offences can be properly reflected by the courts

The Oxford Handbook of Political Communication Kate Kenski, Kathleen Hall Jamieson, 2017 The Oxford Handbook of Political Communication provides contexts for viewing the field examines political discourse media and interpersonal and small group political communication and considers political communication's evolution inside the altered political communication landscape Agendas for future research and innovation are presented

The Dynamics of Public Opinion Mary Layton Atkinson, K. Elizabeth Coggins, James A. Stimson, Frank R. Baumgartner, 2021-11-11 A central question in political representation is whether government responds to the people To understand that we need to know what the government is doing and what the people think of it We seek to understand a key question necessary to answer those bigger questions How does American public opinion move over time We posit three patterns of change over time in public opinion depending on the type of issue Issues on which the two parties regularly disagree provide clear partisan cues to the public For these party cue issues we present a slight variation on the thermostat theory from Soroka and Wlezien 2010 Wlezien 1995 our implied thermostat model A smaller number of issues divide the public along lines unrelated to partisanship and so partisan control of government provides no relevant clue Finally we note a small but important class of issues which capture response to cultural shifts

The Spiral of Silence Elisabeth Noelle-Neumann, 1993-11-15 In this groundbreaking work Elisabeth Noelle Neumann examines public opinion as a form of social control in which individuals almost instinctively sensing the opinions of those around them shape their behavior to prevailing attitudes about what is acceptable For this second edition Noelle Neumann has added three new chapters the first discusses new discoveries in the history of public opinion the second continues the author's efforts to construct a comprehensive theory of public opinion addressing criticisms and defenses of her spiral of silence theory that have appeared since 1980 the third offers a concise and updated summary of

the book s arguments
