Listening, Thinking, Being Lisbeth Lipari, 2015-12-07 Although

listening is central to human interaction its importance is often ignored In the rush to speak and be heard it is easy to neglect listening and disregard its significance as a way of being with others and the world Drawing upon insights from phenomenology linguistics philosophy of communication and ethics Listening Thinking Being is both an invitation and an intervention meant to turn much of what readers know or think they know about language communication and listening inside out It is not about how to be a good listener or the numerous pitfalls that stem from the failure to listen Rather the purpose of the book is first to make readers aware of the value and importance of listening as a fundamental human ability inextricably connected with language and thought second to alert readers to the complexity of listening from personal cultural and philosophical perspectives and third to offer readers a way to think of listening as a mode of communicative action by which humans create and abide in the world Lisbeth Lipari brings together historical literary intercultural scientific musical and philosophical perspectives as well as a range of her own personal experiences to produce this highly readable analysis of how the human experience of being as an ethical relation with others is enacted by means of listening

Out of Time? Elena Backhausen, Benjamin Wihstutz, Noa Winter, 2023-07-10 Out of Time has many different meanings amongst them outmoded out of step under time pressure no time left or simply delayed In the disability context it may also refer to resistant attitudes of living in crip time that contradict time as a linear process with a more or less predictable future According to Alison Kafer crip time bends the clock to meet disabled bodies and minds What does this mean in the disability arts What new concepts of accessibility crip futures and crip resistance can be staged or created by disability performance And how does the notion of out of time connect crip time with pandemic time in disability performance The collective volume seeks to respond to these questions by exploring crip time in disability performance as both a concept and a phenomenon The book tackles the topic from two angles on the one hand from a theoretical point of view that connects performance analysis with crip and performance theory on the other hand from a practice based perspective of disability artists who develop new concepts and dramaturgies of crip time based on their own lived experiences and observations in the field of the performing and disability arts The book gathers different types of text genres forms and styles that mirror the diversity of their authors Besides theoretical and academic chapters on disability performance the book also includes essays poems dramatic texts and choreographic concepts that reflect upon the alternative knowledge in the disability arts
