Swartz,William E. Martin,Jody L.

Swartz-Kulstad,2013-01-11 This volume provides a thorough examination of the interplay between individuals and their environment in the development and maintenance of problem behaviors and delineates procedures for conducting assessment intervention and prevention within the child s ecosystem As individuals structure change and organize their environments their environments work to do the same Environmental or contextual and individual variables act reciprocally to shape an individual s behavior For school aged youth this reality necessitates an ecological approach to assessment intervention and prevention Specifically problem behaviors are partly developed and maintained by a combination of factors present in the child s psychosocial ecosystem home school and community Although there is an abundance of theoretical applications and research supporting this concept the predominant trend has been to emphasize the properties of the person As a result one is left to assume that the genesis of difficulties in adaptation lies in internal or personal states and traits of the individual In contrast to traditional psychology theories which focus primarily on the individual incorporation of ecological psychology concepts allows for a more comprehensive and in depth analysis of sources contributing to the individual s ability to adapt to their psychosocial environment Ecological theories which drive assessment intervention and prevention efforts provide the necessary framework for assisting school aged youth and their associated ecological networks to cope with and overcome the multidetermined multifaceted concerns that arise during the school years However this is an often difficult and cumbersome task for educators parents and school systems to undertake To this end this volume focuses on the functional application of ecological psychology for schools within communities Each of the 10 chapters written by key

figures in school family counseling and community psychology explores the use of ecological theory from a different perspective ranging from focus on the child the child within the classroom the classroom teacher and the community to considerations in working with special populations such as juvenile delinquents and in planning for developmental issues such as school to work transition The final chapter summarizes and integrates the previous chapters and provides suggestions for future directions in the field
