

BlackBerry Curve Disassembly and Assembly Instructions

After removing the battery cover and battery, use the T3 torque driver to remove the 2 screws.

Use the plastic pry tool to remove the bottom cover. Pry on both sides, near the camera where the user's hand would be.

The bottom is held on by 4 tabs. Be careful not to break them. Slowly apply pressure as shown to remove the bottom while lifting up, so as not to damage the bottom adhesive or user's hand.

Insert the plastic pry tool between the faceplate and the side. Slide it down, gently, trying to release the top clip.

Slide the tool down on the same side and release the bottom clip. Repeat steps 4 and 5 for the other side. **Take special care in separating the faceplate from the screen.**

Use the T5 torque driver to remove the 2 screws to release the sides. Remove the sides from the Curve.

Remove and discard the foam around the screen.

To reassemble the Curve, begin by attaching the ColorWare custom sides. Use the T5 torque driver to secure them.

Remove the inside of the faceplate and LCD as clean as possible within point. Remove the adhesive backing on the ColorWare faceplate.

Gently press the faceplate on, making sure all 4 clips are fully secured, and the edges of the screen adhere to the unit.

Starting with the back, press the bottom piece into position.

Use the T3 torque driver to secure the faceplate. Then, place the battery in the Curve and slide the battery cover on.
