A Small World Smart Houses And The Dream Of The Perfect Day:

A Small World Davin Heckman, 2008-03-13 A look at how domestic technologies that free people to enjoy leisure time in the home have come to be understood as necessary parts of everyday life *A Small World* Davin Heckman, 2008-03-13 A look at how domestic technologies that free people to enjoy leisure time in the home have come to be understood as necessary parts of everyday life The Smart Wife Yolande Strengers, Jenny Kennedy, 2021-08-31 The life and times of the Smart Wife feminized digital assistants who are friendly and sometimes flirty occasionally glitchy but perpetually available Meet the Smart Wife at your service an eclectic collection of feminized AI robotic and smart devices This digital assistant is friendly and sometimes flirty docile and efficient occasionally glitchy but perpetually available She might go by Siri or Alexa or inhabit Google Home She can keep us company order groceries vacuum the floor turn out the lights A Japanese digital voice assistant a virtual anime hologram named Hikari Azuma sends her master helpful messages during the day an American sexbot named Roxxy takes on other kinds of household chores In *The Smart Wife* Yolande Strengers and Jenny Kennedy examine the emergence of digital devices that carry out wifework domestic responsibilities that have traditionally fallen to human wives They show that the principal prototype for these virtual helpers designed in male dominated industries is the 1950s housewife white middle class heteronormative and nurturing with a spick and span home It's time they say to give the Smart Wife a reboot What's wrong with preferring domestic assistants with feminine personalities We like our assistants to conform to gender stereotypes so what For one thing Strengers and Kennedy remind us the design of gendered devices reinscribes those outdated and unfounded stereotypes Advanced technology is taking us backwards on gender equity Strengers and Kennedy offer a Smart Wife manifesta proposing a rebooted Smart Wife that would promote a revaluing of femininity in society in all her glorious diversity *Electronic Elsewheres* Chris Berry, So-yŏng Kim, Lynn Spigel, 2010 Some chapters were previously published **Threshold** Heather Suzanne Woods, 2024-05-15 Smart homes are domestic spaces outfitted with networked technology made by brands like Google Facebook Amazon and Apple However Silicon Valley purveyors are not the only important actors in smart home development Appliance makers logistics companies health and wellness conglomerates insurance companies and security franchises are all betting on the smart home in an economy that puts a premium on data Together major players in the smart home space have successfully attracted the attention and pocketbooks of millions of households by touting the virtues of ambient networked technologies as an upgrade to modern domestic life If industry predictions hold nearly half of American houses will be smart by 2024 Yet what it means to be smart is still unsettled Threshold asks and answers the question How do smart homes communicate cultural values about the role of technology in the 21st century Answering this question is time sensitive as the coming years will determine how smart homes are configured who has access to them and what they mean to their owners policy makers technology companies and others invested in these domestic digital platforms The consequences of these decisions are significant because they impact

both smart home residents and society at large. At present much of the research on smart homes caters either to industry experts or scientists and engineers. This literature often describes or evaluates the technical capacities of the smart home or focuses on user interface and design. Instead Heather Woods argues we need a sustained cultural analysis of smart homes that considers the socio technical variables: gender, class, income, disparity, race, criminal justice, the housing market, and the future of both labor and domesticity that give the smart home meaning. Threshold takes up this challenge from a rhetorical perspective, arguing that smart homes are lived material embodiments of the digital cultures in which they are imagined, built, and used. Those considerations more often than not are relegated to secondary considerations when in truth they are the most pervasive and consequential factors affecting anyone participating in a smart home ecosystem. Woods argues that smart homes are spatial manifestations of a phenomenon called living in digitality, a cultural condition whereby users engage with technology at every moment of every day. Using extensive fieldwork at smart homes throughout the USA, Woods traces how smart homes urge ubiquitous computing as a normalized daily practice, readying domestic spaces and their occupants for an increasingly transactional digital future that is largely controlled by corporate interests. Threshold advances knowledge in three ways: by 1. Offering definitional tools for identifying and evaluating immersive technologies including but not limited to the smart home; 2. Identifying three distinct configurations of the smart home according to their domestic and technological functions; 3. Demonstrating the productive capacity of smart homes and smart devices to influence social life. The book highlights the rhetorical force of smart domesticity for rhetorical scholars, digital humanists, political scientists, critical theorists, policy makers, and residents or prospective residents of smart homes. Ultimately Threshold serves as a toolkit for recognizing and responding to the persistent encroachment of digital technologies in all parts of our lives.

Questioning Technology with Jacques Ellul David W. Gill, Lisa Richmond, 2025-10-07. Twenty-first century technology is an ever-expanding powerful force in virtually every aspect of human life and every corner of the globe. So much of modern technology has resulted in positive improvements in communication, work, health, and other domains. Technology's promises and possibilities for the future are often glowing. But it is one thing for technology to function as a tool serving human purpose and flourishing, and quite another for it to be granted the position of unquestioned master. All technologies deserve to be questioned. What are their costs, trade-offs, and potential or real negative impact? And how do we create limits and controls for technological invasion when these would be wise and necessary? Questioning Technology with Jacques Ellul addresses these questions in both the big picture and in their relevance to specific arenas such as art, politics, work, and religion, with voices from not just the academy but also the workplace and society.

The Computer's Voice Liz W. Faber, 2020-12-22. A deconstruction of gender through the voices of Siri, HAL 9000, and other computers that talk. Although computer-based personal assistants like Siri are increasingly ubiquitous, few users stop to ask what it means that some assistants are gendered female, others male. Why is Star Trek's computer coded as female while HAL 9000 in 2001 A Space Odyssey is heard as male? By examining how

gender is built into these devices author Liz W Faber explores contentious questions around gender its fundamental constructedness the rigidity of the gender binary and culturally situated attitudes on male and female embodiment Faber begins by considering talking spaceships like those in Star Trek the film Dark Star and the TV series Quark revealing the ideologies that underlie space age progress She then moves on to an intrepid decade by decade investigation of computer voices tracing the evolution from the masculine voices of the 70s and 80s to the feminine ones of the 90s and 00s Faber ends her account in the present with incisive looks at the film Her and Siri herself Going beyond current scholarship on robots and AI to focus on voice interactive computers The Computer s Voice breaks new ground in questions surrounding media technology and gender It makes important contributions to conversations around the gender gap and the increasing acceptance of transgender people

Meet Me at the Fair: A World's Fair Reader Celia Pearce, Bobby Schweizer, Laura Hollengreen, Rebecca Rouse, 2014 Together with the Olympics world s fairs are one of the few regular international events of sufficient scale to showcase a spectrum of sights wonders learning opportunities technological advances and new or renewed urban districts and to present them all to a mass audience Meet Me at the Fair A World s Fair Reader breaks new ground in scholarship on world s fairs by incorporating a number of short new texts that investigate world s fairs in their multiple aspects political urban architectural anthropological sociological technological commercial popular and representational Contributors come from eight different countries and represent affiliations in academia museums and libraries professional and architectural firms non profit organizations and government regulatory agencies In taking the measure of both the material artifacts and the larger cultural production of world s fairs the volume presents its own phantasmagoria of disciplinary perspectives historical periods geographical locales media and messages mirroring the microcosmic form of the world s fair itself

Smart Things Mike Kuniavsky, 2010-09-14 The world of smart shoes appliances and phones is already here but the practice of user experience UX design for ubiquitous computing is still relatively new Design companies like IDEO and frogdesign are regularly asked to design products that unify software interaction device design and service design which are all the key components of ubiquitous computing UX and practicing designers need a way to tackle practical challenges of design Theory is not enough for them luckily the industry is now mature enough to have tried and tested best practices and case studies from the field Smart Things presents a problem solving approach to addressing designers needs and concentrates on process rather than technological detail to keep from being quickly outdated It pays close attention to the capabilities and limitations of the medium in question and discusses the tradeoffs and challenges of design in a commercial environment Divided into two sections frameworks and techniques the book discusses broad design methods and case studies that reflect key aspects of these approaches The book then presents a set of techniques highly valuable to a practicing designer It is intentionally not a comprehensive tutorial of user centered design as that is covered in many other books but it is a handful of techniques useful when designing ubiquitous computing user experiences In short Smart Things

gives its readers both the why of this kind of design and the how in well defined chunks Tackles design of products in the post Web world where computers no longer have to be monolithic expensive general purpose devices Features broad frameworks and processes practical advice to help approach specifics and techniques for the unique design challenges Presents case studies that describe in detail how others have solved problems managed trade offs and met successes **The Aesthetics of Nostalgia TV** Alex Bevan, 2019-02-07 The Aesthetics of Nostalgia TV explores the aesthetic politics of nostalgia for 1950s and 60s America on contemporary television Specifically it looks at how nostalgic TV production design shapes and is shaped by larger historical discourses on gender and technological change and America's perceived decline as a global power Alex Bevan argues that the aesthetics of nostalgic TV tell stories of their own about historical decline and progress and the place of the baby boomer television suburb in American national memory She contests theories on nostalgia that see it as stagnating regressive or a reversion to outdated gender and racial politics and the technophobic longing for a bygone era and instead argues nostalgia is an important form of historical memory and vehicle for negotiating periods of historical transition The book addresses how and why the shows construct the boomer era as a placeholder for gender racial technological and declensionist discourses of the present The book uses Mad Men AMC 2007 2015 Ugly Betty ABC 2006 2010 Desperate Housewives ABC 2004 2012 and film remakes of 1950s and 60s family sitcoms as primary case studies
