The Law of Cryonics Pierre de Gioia Carabellese,Camilla Della Giustina,2024-03-19 This book through the lens of interdisciplinary legal analysis draws a subtle balance between bioethics and financial regulation with the latter playing an unexpectedly crucial role in the way life may potentially be governed The legal topic of human preservation or cryoconservation was initially developed in the United States in the case of *Donaldson v van de Kamp* More recently the subject arose in Europe as a result of a decision of the High Court Family Division London This new theme of cryoconservation has unfolded through multifaceted forms including its impact on regulation In an area that may at least prima facie be regarded as belonging to the traditional realm of medical law the findings presented here suggest that its potential has strong economic implications The work argues that it is necessary also to look at this subject from a more interdisciplinary perspective drawing a fil rouge between two otherwise seemingly opposing areas of law medical law and financial regulation The legal framework draws on the Anglo American and the United Kingdom in particular along with civil law analysis from Italy The work will be of interest to researchers and academics in the

areas of medical law legal philosophy financial law property law and insurance law Governing the Future Henning Glaser,Pindar Wong,2025-02-28 We are living in times of deep and disruptive change Perhaps the most powerful vector of this change can be described by three related catchphrases digitalization artificial intelligence and dataism Drawing on considerable expertise from a wide range of scholars and practitioners this interdisciplinary collection addresses the challenges impacts opportunities and regulation of this civilizational transformation from a variety of angles including technology philosophy cultural studies international law sociology and economics This book will be of special interest to scholars students analysts policy planners and decision makers in think tanks international organizations and state agencies studying and dealing with the development and governance of disruptive technologies **Considerations on the AI Endgame** Soenke Ziesche,Roman V. Yampolskiy,2025-03-20 This seminal volume offers an interdisciplinary exploration into the rapidly evolving field of artificial intelligence and its societal implications Written by leading scholars Soenke Ziesche and Roman V Yampolskiy the book delves into a multitude of topics that address the rapid technological advancements in AI and the ethical dilemmas that arise as a result The topics explored range from an in depth look at AI welfare science and policy frameworks to the mathematical underpinnings of machine intelligence These subjects include discussions on preserving our personal identity in technological contexts as well as on the question of AI identity innovative proposals towards the critical AI value alignment problem and a call to merge Western and non Western approaches towards universal AI ethics The work also introduces unconventional yet crucial angles such as the concept of ikigai in AI ethics and a pioneering attempt to map a potential AI driven ikigai universe as well as the role of design formalisation or Designometry in the creation of artefacts By offering a balanced mix of theoretical and applied insights the book serves as an invaluable resource for researchers policymakers and anyone interested in the future of AI and the extent of its impact on society *Challenges of the Technological Mind* Paulo Alexandre e Castro,2024-05-15 This book presents a set of texts that reflect different approaches to the relationship between mind and technology In today s increasingly technological world a myriad of different and dizzying challenges face humanity the ever closer relationship between man and machine the exponential development of Artificial Intelligence man s relationship with virtual worlds the relationship with new realities such as the neuro potentiation of his capacities the appearance of robots in everyday life and so on In this volume renowned world specialists explore these concerns and discuss limitations and possible problems surrounding the interaction of man and machine The book provides a well researched thought provoking analysis of the need to rethink the theory of the mind proposing relevant answers to pressing questions and raising new questions that need to be considered **Future T/Issues** Ruth Gehrmann,2024-07-01 Transplant practices are discussed in the medical realm in fictional texts and in popular advertisement Yet how do these sectors intersect and influence each other How can the accounts of surgeons invested in transplant practice be brought into conversation with fictional voices Future T Issues positions transplantation at the intersection of natural science and the

humanities and adds to the discussion of organ transplantation by focusing on one specific aspect that is commonly overlooked the idea of speculation By engaging with speculative fiction in conversation with life writing it contributes to a more thorough understanding of transplantation as a cultural practice showcasing that transplantation is imagined as part of the future both within and beyond the literary sphere Hereby this book establishes the relationship between literary and medical narratives as reciprocal in effect eroding boundaries between the life sciences and literary studies As an interdisciplinary endeavor this study contributes to literary studies specifically to the fields of life writing speculative fiction and young adult fiction it offers insights for the study of transplantation in the popular realm and adds to the medical humanities
