

An aerial photograph showing a massive, dark, irregular slick of oil floating on the surface of the ocean. The slick is composed of many smaller, interconnected patches of dark brown and black oil. The surrounding water is a deep blue. At the bottom of the image, several red lines, likely representing containment booms, are visible, partially enclosing the oil slick.

"A revealing, thoughtful history of a moment when human manipulation of nature malfunctioned spectacularly."

A Sea in Flames Carl Safina, 2011-04-19 Carl Safina has been hailed as one of the top 100 conservations of the 20th century Audubon Magazine and *A Sea in Flames* is his blistering account of the months long manmade disaster that tormented a region and mesmerized the nation Traveling across the Gulf to make sense of an ever changing story and its often nonsensical twists Safina expertly deconstructs the series of calamitous misjudgments that caused the Deepwater Horizon blowout zeroes in on BP's misstatements evasions and denials reassesses his own reaction to the government's crisis handling and reviews the consequences of the leak and what he considers the real problems which the press largely overlooked Safina takes us deep inside the faulty thinking that caused the lethal explosion We join him on aerial surveys across an oil coated sea We confront pelicans and other wildlife whose blue universe fades to black Safina skewers the excuses and the silly jargon like junk shot and top kill that made the tragedy feel like a comedy of horrors and highlighted Big Oil's appalling lack of preparedness for an event that was inevitable Based on extensive research and interviews with fishermen coastal residents biologists and government officials *A Sea In Flames* has some surprising answers on whether it was Obama's Katrina whether the Coast Guard was as inept in its response as BP was misleading and whether this worst unintended release of oil in history was really America's worst ecological disaster Impassioned moving and even sharply funny *A Sea in Flames* is ultimately an indictment of America's main addiction Safina writes In the end this is a chronicle of a summer of pain and hope Hope that the full potential of this catastrophe would not materialize hope that the harm done would heal faster than feared and hope that even if we didn't suffer the absolutely worst we'd still learn the big lesson here We may have gotten two out of three That's not good enough Because there'll be a next time *A Sea in Flames* Carl Safina, 2011-04-19 Carl Safina has been hailed as one of the top 100 conservations of the 20th century Audubon Magazine and *A Sea in Flames* is his blistering account of the months long manmade disaster that tormented a region and mesmerized the nation Traveling across the Gulf to make sense of an ever changing story and its often nonsensical twists Safina expertly deconstructs the series of calamitous misjudgments that caused the Deepwater Horizon blowout zeroes in on BP's misstatements evasions and denials reassesses his own reaction to the government's crisis handling and reviews the consequences of the leak and what he considers the real problems which the press largely overlooked Safina takes us deep inside the faulty thinking that caused the lethal explosion We join him on aerial surveys across an oil coated sea We confront pelicans and other wildlife whose blue universe fades to black Safina skewers the excuses and the silly jargon like junk shot and top kill that made the tragedy feel like a comedy of horrors and highlighted Big Oil's appalling lack of preparedness for an event that was inevitable Based on extensive research and interviews with fishermen coastal residents biologists and government officials *A Sea In Flames* has some surprising answers on whether it was Obama's Katrina whether the Coast Guard was as inept in its response as BP was misleading and whether this worst unintended release of oil in history was

Layzer, Sara R.

Rinfret, 2019-08-13 Answers to environmental issues are not black and white Debates around policy are often among those with fundamentally different values and the way that problems and solutions are defined plays a central role in shaping how those values are translated into policy The Environmental Case captures the real world complexity of creating environmental policy and this much anticipated Fifth Edition contains fifteen carefully constructed cases Through her analysis Sara Rinfret continues the work of Judith Layzer and explores the background players contributing factors and outcomes of each case and gives readers insight into some of the most interesting and controversial issues in U.S. environmental policymaking *Stress*

Testing the USA J. Short, 2015-12-04 In this volume the USA is treated as a system that has been stress tested by four unique events the War on Terror Hurricane Katrina the Financial Meltdown that led to the Great Recession and the Giant Oil Spill

The author uses stress testing to identify weaknesses within the system and examine the response to disaster **Humans versus Nature** Daniel R. Headrick, 2019-12-02 Since the appearance of *Homo sapiens* on the planet hundreds of thousands of years ago human beings have sought to exploit their environments extracting as many resources as their technological ingenuity has allowed As technologies have advanced in recent centuries that impulse has remained largely unchecked exponentially accelerating the human impact on the environment *Humans versus Nature* tells a history of the global environment from the Stone Age to the present emphasizing the adversarial relationship between the human and natural worlds Nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance Daniel R. Headrick shows how environmental changes epidemics climate shocks and volcanic eruptions have molded human societies and cultures sometimes overwhelming them At the same time he traces the history of anthropogenic changes in the environment species extinctions global warming deforestation and resource depletion back to the age of hunters and gatherers and the first farmers and herders He shows how human interventions such as irrigation systems over fishing and the Industrial Revolution have in turn harmed the very societies that initiated them Throughout Headrick examines how human driven environmental changes are interwoven with larger global systems dramatically reshaping the complex relationship between people and the natural world In doing so he roots the current environmental crisis in the deep past

system s weak spots This second edition provides a stress testing of the United States by exploring in detail the background to the disasters of the War on Terror Hurricane Katrina the financial crisis the Gulf oil spill and the COVID 19 epidemic These major stresses the country s longest war its biggest natural disaster its biggest financial collapse since the Great Depression its biggest oil spill and its worst pandemic since the influenza pandemic of 1918 tell us much about structural flaws in the United States This book explores each of these events in detail to locate the seed of the disasters and highlights what we have learned and not learned from these stress tests **The Age of Catastrophe** John David Ebert,2012-09-13

Disasters both natural and man made are on the rise Indeed a catastrophe of one sort or another seems always to be unfolding somewhere on the planet We have entered into a veritable Age of Catastrophes which have grown both larger and

more complex and now routinely very widespread in scope The old days of the geographically isolated industrial accidents of the sinking of a Titanic or the explosion of a Hindenburg together with their isolated causes and limited effects are over Now disasters on the scale of Hurricane Katrina the BP oil spill or the Japan tsunami and nuclear reactor accident threaten to engulf large swaths of civilization This book analyzes the efforts of Westerners to keep the catastrophes outside while maintaining order on the inside of society These efforts are breaking down Nature and Civilization have become so intertwined they can no longer be separated Natural disasters moreover are becoming increasingly more difficult to differentiate from man made Instructors considering this book for use in a course may request an examination copy here

New Seeds of Profit Mark S. Ferrara, 2019-04-19 When Captain Christopher Newport and his crew landed on the muddy banks of the James River in 1607 after four months at sea they aimed to establish a new colony not for God or the greater good of humanity but for the sake of profit The Pilgrims who settled in Cape Cod in 1620 as agents of Plymouth Company found evidence of divine election in the fortunes they accumulated from a lucrative system of town founding in the New World The innovative and often ruthless entrepreneurs who followed these colonists carved out the immense North American frontier wilderness from the Atlantic Ocean to the golden sands of the California coast and they forged industrial and technological revolutions that shook the world *New Seeds of Profit* examines the role of business leaders from George Washington to Donald Trump in shaping the United States into a business nation unlike any other in world history By tracing the influence of industry and commerce on American society through portraits of successful entrepreneurs this book sheds light on the esteemed place Americans reserve for their wealthiest business leaders and it measures the true cost of that adulation by demonstrating how enterprise driven solely by the bottom line imperils people and the environment In a story teeming with the heroes and villains of enterprise *New Seeds of Profit* offers an innovative business model that provides meaningful work to employees and socially responsible returns to investors while encouraging sustainable stewardship of the earth and advancing the common good
