investigating and documenting more than two thousand of these past life memory cases Now his essentially unknown work is being brought to the mainstream by Tom Shroder the first journalist to have the privilege of accompanying Dr Stevenson in his fieldwork Shroder follows Stevenson into the lives of children and families touched by this phenomenon changing from skeptic to believer as he comes face to face with concrete evidence he cannot discount in this spellbinding and true story

*The Idea of Man* Mark Aman, 2018-04-03 The Idea of Man presents a new ontology or idea of human being by developing the logic that naturally flows from that which is original necessary inherent and essential to this being upright posture The verticality of man simply and mutely constituted by his innate uprightness is taken as the ontological key to understanding the idea of man the world of language and the very possibility of Being itself In this the book conceives in unison both an Ontological Anthropology and an Anthropological Ontology

*Realism and Anti-Realism* Stuart Brock, Edwin Mares, 2014-12-18 There are a bewildering variety of ways the terms realism and anti realism have been used in philosophy and furthermore the different uses of these terms are only loosely connected with one another Rather than give a piecemeal map of this very diverse landscape the authors focus on what they see as the core concept realism about a particular domain is the view that there are facts or entities distinctive of that domain and their existence and nature is in some important sense objective and mind independent The authors carefully set out and explain the different realist and anti realist positions and arguments that occur in five key domains science ethics mathematics modality and fictional objects For each area the authors examine the various styles of argument in support of and against realism and anti realism show how these different positions and arguments arise in very different domains evaluate their success within these fields and draw general conclusions about these assorted strategies Error theory fictionalism non cognitivism relativism and response dependence are taken as the most important positions in opposition to the realist and these are explored in depth Suitable for advanced level undergraduates the book offers readers a clear introduction to a subject central to much contemporary work in metaphysics epistemology and philosophy of language
