Black Students Middle Class Teachers:

Black Students-Middle Class Teachers Jawanza Kunjufu, 2002 This compelling look at the relationship between the majority of African American students and their teachers provides answers and solutions to the hard hitting questions facing education in today's black and mixed race communities Are teachers prepared by their college education departments to teach African American children Are schools designed for middle class children and if so what are the implications for the 50 percent of African Americans who live below the poverty line Is the major issue between teachers and students class or racial difference Why do some of the lowest test scores come from classrooms where black educators are teaching black students How can parents negotiate with schools to prevent having their children placed in special education programs Also included are teaching techniques and a list of exemplary schools that are successfully educating African Americans **White**

Teachers, Black Students Mack T. Hines III, 2017-08-08 Can White teachers teach Black Students This is the provocative and pointed inquiry that drives the creation of White Teachers Black Students The twin purpose of this book is how can White teachers consistently teach and reach Black students Hines starts the book by framing these inquiries within the historical context of race whiteness and white people He then carefully draws a line from this context to the modern day white framing of White teachers actions towards African American students White teachers are challenged to disrupt this teaching identity for a more developed and diverse worldview regarding race From there Hines presents a framework for translating White racial awareness into the ultimate White racial actualization an affirmation of the ability to facilitate Black student achievement **The Impact of Mentoring African American Middle Grade Males** Linda W.

Washington, 2012-10-12 This insightful book gives suggestions on increasing academic rigor of the middle school male student increasing consistent student attendance and decreasing discipline referrals This book gives situational examples and possible suggestions to help single parents teachers administrators board members and the male student to overcome obstacles to be successful Washington believes that bonding should initially take place early in the relationship of the teacher to student and student to teacher Much like a client coming to a store for specific items the store owner has to get to know his customer in order to effectively serve this individual for continued customer satisfaction The same principles apply for teachers getting to know their students Oftentimes this notion is not developed because of constant new initiatives being introduced to teachers without lasting results Hence mentoring of students can eliminate many problems schools face Using the suggestions offered in this book will cause increase academic performance and attendance while decreasing discipline referrals tremendously **Preservice Teachers, Social Class, and Race in Urban Schools** Andrea D.
