Burger King Nuggets Review:

Maladaptive Consumer Behavior Ingrid M. Martin, David W. Stewart, 2024-07-29 This edited volume provides a marketing perspective on maladaptive consumer behavior especially behavior with dysfunctional consequences that does not have its origins in physical addiction. It brings together contributions of leading scholars who have expertise in various forms of maladaptive consumption. The chapters address specific manifestations of maladaptive consumption such as those related to food, alcoholic beverages, online gaming, and media consumption among others, with an emphasis on behaviors that are not traditionally regarded as arising from physical addiction. Further, the book includes chapters that focus more broadly on definitional and conceptual issues, methodological approaches, implications for intervention and regulation, and the value judgments inherent in the identification and classification of behaviors as maladaptive. It examines numerous alternative theories of maladaptive consumption and places such behavior in a larger market context. Taken together, the contributions in this volume 1) describe the general phenomenon of maladaptive consumption, 2) describe specific manifestations of maladaptive consumption, 3) identify issues of research methodology and definition related to the study of maladaptive consumption, and 4) address relevant interventions, regulations, and public policy issues. It will appeal to scholars interested in maladaptive consumption behaviors and their treatments, as well as consumer behavior more generally across multiple fields including marketing, clinical psychology, social work, and public health. **Indiana Review**, 1988 Marketing and AI:

Shaping the Future Together Vincent Jeseo, Jasmine Parajuli, 2024-12-23 The growing availability of data, intelligent computational systems, and affordable storage and software has spurred a keen interest among marketers to explore new artificial intelligence (AI) methods and applications to enhance outcomes. However, this technological race can lead marketers to hastily implement AI platforms without a clear objective, causing organizations to lose focus, become disconnected from customers, waste resources, and blindly follow a never-ending trend. This book explores the influence of AI on the marketing field. Featuring full papers presented at the 2024 Academy of Marketing Science Annual Conference in Coral Gables, FL, USA, this book offers research theories, methodologies, and case studies on the use of AI by marketers in various areas to better serve customers and satisfy their needs. It also explores the role that academics play in supporting marketing scholars, students, researchers, consumers, practitioners, and stakeholders in understanding and navigating these technological changes. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses, and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights complementing the Academy's flagship journals, the *Journal of the Academy of Marketing Science* (JAMS) and *AMS Review*. **Chew on this** Eric
