[Optimizing Your Website for Mobile Safari](#) August Trometer, 2007-10-29. This is the eBook version of the printed book *Optimizing Your Website for Mobile Safari Digital Short Cut* by August Trometer. When Apple announced the iPhone, they also ushered in yet another mobile browser for web developers to contend with: Mobile Safari. While Safari is built on the typical web standards supported by other browsers, Mobile Safari brings in an entirely new paradigm of web browsing. With its touch screen display, users tap and pinch on web pages to bring the content into view. And while most web sites should work normally on the iPhone and iPod touch's Mobile Safari, there are some additional tweaks web designers can make to their sites to enhance the user experience. This digital Short Cut introduces web designers and developers to the basic concepts of browsing on the iPhone and iPod touch using Mobile Safari. You'll learn about how the browser works and why it's so important to help users get the full experience from your website. You'll also learn about ways to detect Mobile Safari using JavaScript and PHP, how to serve up a style sheet that's Mobile Safari specific to ensure your website is viewable on the iPhone and iPod touch, Mobile Safari specific CSS attributes that take advantage of Safari's WebKit, which MIME types are supported and more importantly, not supported by Mobile Safari, how to create video content for viewing in Mobile Safari. This Short Cut pulls together all the information you need to make your website iPhone and iPod touch compatible and condenses it down into a quick run-through of everything you need to know.
