

2.2 Transmission and shift system

2.2.1 Description of the transmission

The ZF-AS TRONIC transmission consists of a four-speed section (in the 16-speed version) or a three-speed version (in the 12 and 10-speed version) as well as a splitter group (GV) and a rear-mounted range-change group (GP) in a planetary design.

The transmission is based on a twin countershaft design. This compact and reduced weight design ensures a positive torque distribution, lower gear loadings and therefore a higher degree of efficiency.

The 4(3)-speed transmission section is produced with a dog clutch. Synchronization occurs via the EDC and transmission brake. The splitter group and range-change group have synchromesh.

Example: 16 AS 2601

2.2.2 Description of the shift system

The gear shift cylinders are integrated in the transmission actuator and are pneumatically actuated.

Key

- 1 Transmission actuator
- 2 Shift cylinder for splitter group
- 3 Shift cylinder for main transmission
- 4 Shift cylinder for range-change group
- 5 Selector cylinder for main transmission
