The Hypothesis of Undesigned Coincidences Michael J. Alter, 2024-11-14 The hypothesis of Undesigned Coincidences was first proposed by William Paley 1743 1805 and later popularized by J J Blunt 1794 1855 More recently Lydia and Timothy McGrew have revived this hypothesis McGrew defines an undesigned coincidence as a significant connection between two or more accounts or texts that does not appear to have been planned by the individuals providing the accounts Despite their apparent independence the elements fit together like pieces of a puzzle Advocates use undesigned coincidences to argue that the Gospels are a compilation of independent and reliable sources However these advocates do not engage with biblical criticism and overlook relevant research on coincidences and casualness The feeding of the five thousand is a prominent example discussed by proponents who point to details such as the green grass the location of Bethsaida and the question posed by Jesus to Philip These episodes are thoroughly reviewed and analyzed in *The Hypothesis of Undesigned Coincidences*
