specifically on China Besides examining the details of this strategy formulation the book explores the internal and external repercussions on the US Navy of the Pivot to Asia It discusses the Fat Leonard scandal which involved bribery and corruption in contracts for the maintenance of the US fleets in the region and considers the sharp decrease in training and readiness of the Pacific fleet to support the pivot which in turn led to serious maritime collisions It also assesses the impact of the pivot on other countries in the region engaging in the debate as to whether the pivot was necessary in order to convince the countries of the region that the United States had not lost its staying power or whether the pivot managed to make tensions in the Asia Pacific worse even while allowing the strategic situation in the Middle East and Europe to worsen as a result of neglect

Explaining Contemporary Asian Military Modernization Sheryn Lee, 2021-04-20 This book proposes a novel theoretical framework of interactive arming in order to explain armament dynamics in contemporary Asia Frequently the modernisation of contemporary naval forces in Asia is described as an arms race with the underlying assumption being that weapons acquisitions and increases in defence expenditure are competitive and bilateral and due to conflicting purposes or mutual fears This book argues that the concept of an arms race is an unsuitable one for explaining contemporary military modernisation in 21st century Asia Instead it proposes a novel and innovative concept of interactive arming and argues that what drives conflict is political rivalry not weapons acquisitions Instead of perceiving arming as abnormal behaviour the book views arming as a natural strategic behaviour of states and military modernisation as a basic requirement for a state's ability to survive This book will be of much interest to students of Asian security strategic studies and international relations in general
